

The Safety Information Monitoring System (SIMS) is an ICAO web-based information system comprising of a number of applications which generate indicators in support of a State Safety Programme (SSP) and Safety Management Systems (SMS).

Check full list of indicators in the indicator catalogue on the ICAO Public Website
<https://www.icao.int/safety/Pages/Indicator-Catalogue.aspx>

Benefits

Supports
the identification of
hazards and risks

Allows
monitoring of safety
performance

Resolves
need for in-house
analytics technology

Facilitates
data-driven
decision making

SIMS is for ICAO Member States (and their service providers) and it is FREE
