Aviation System Block Upgrades (ASBU) Methodology

Technology Roadmaps and Module Dependencies

The Global Air Navigation Plan (GANP)

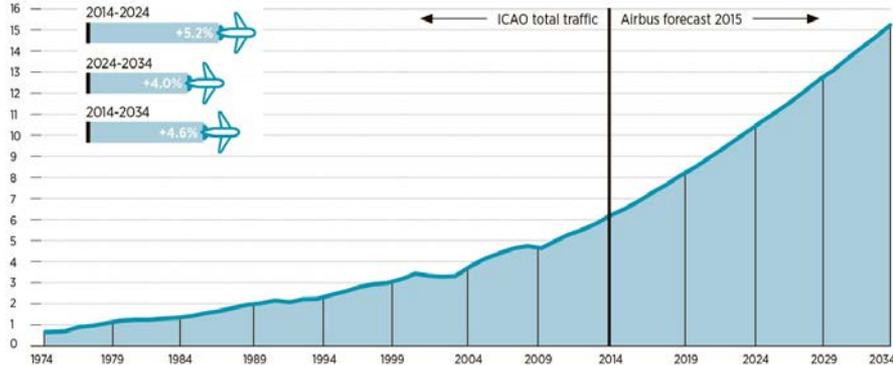

- Strategy to achieve a global interoperable air navigation system offering safe, secure and efficient air transport for people and goods worldwide, while limiting the impact of aviation on the environment.
- The GANP serves as a worldwide reference to transform the air navigation system in an evolutionary and inclusive manner so that no State or Stakeholder is left behind.

A NEW ERA IN AVIATION

- Demand, including new entrants
