

Radio Frequency Interference

**Regional Preparatory Workshop for
WRC-19**

Mexico City, Mexico

6 – 7 February, 2018

Mike Biggs

Senior Engineer

**US FAA Spectrum Engineering
Services**

**Federal Aviation
Administration**

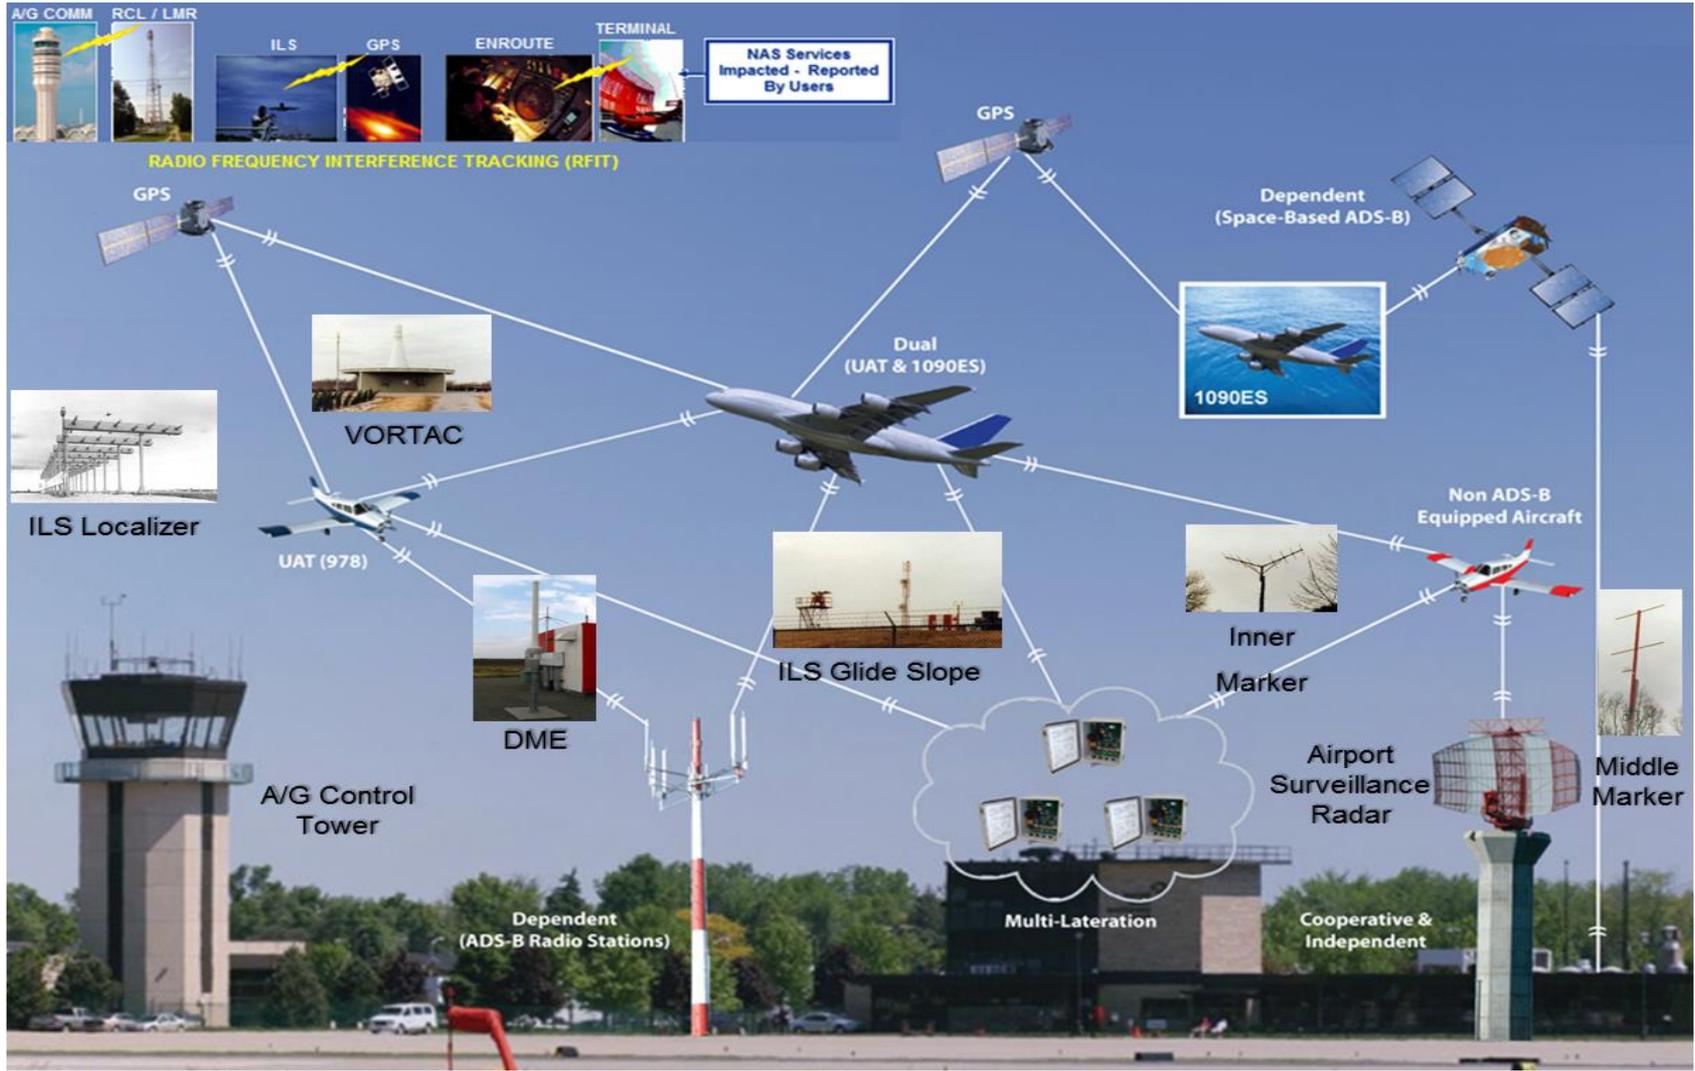

What is Radio Frequency Interference (RFI)?

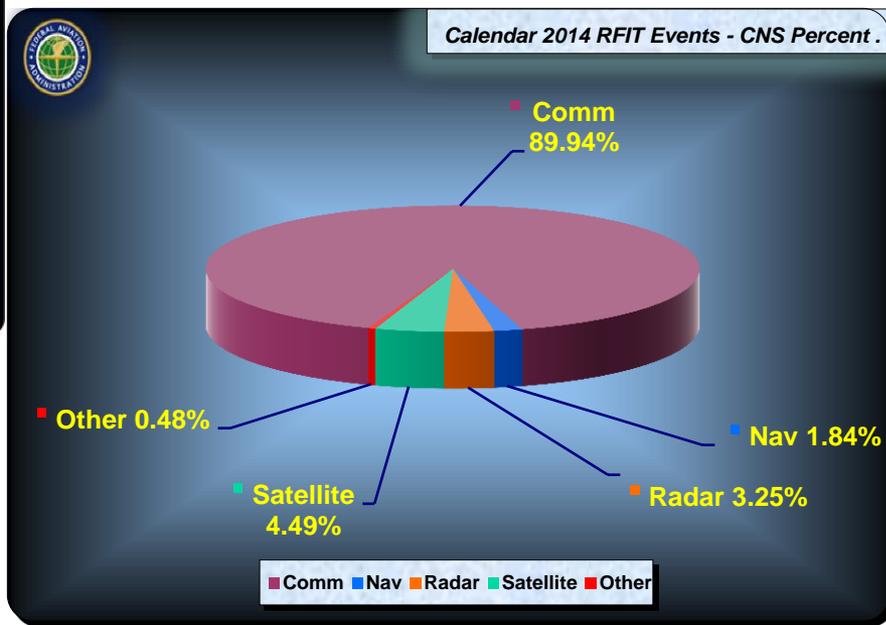

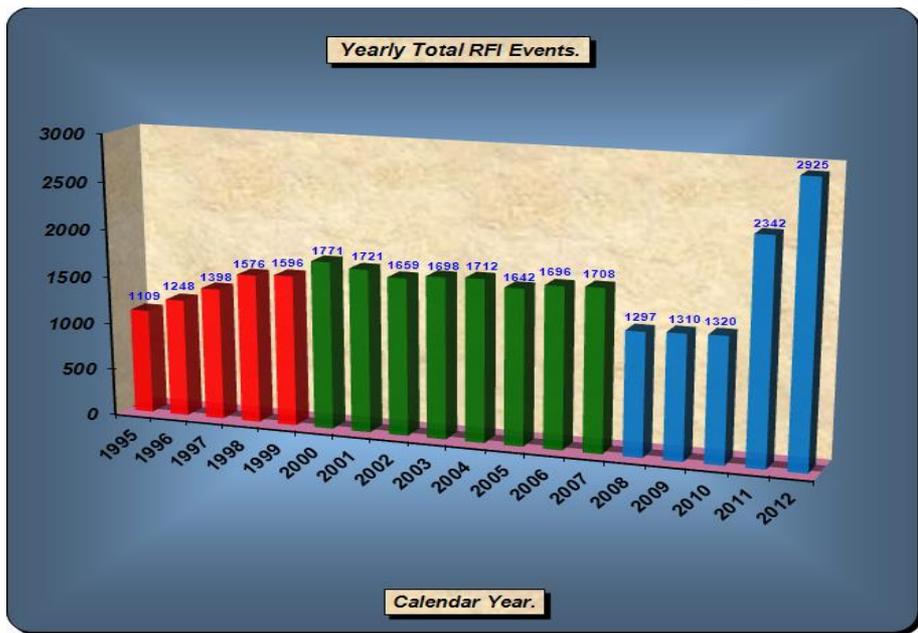

- **ITU Definition:** The effect of unwanted energy due to one or a combination of emissions, radiations, or inductions upon reception in a radiocommunication system, manifested by any performance degradation, misinterpretation, or loss of information which could be extracted in the absence of such unwanted energy.
- **Criteria to mitigate inter-system interference are established as an element of ICAO SARPs.**
 - E.g., 8 dB D/U for co-channel DME assignments

RF Dependent Aviation Systems

US RFI Yearly Activity Statistics

- Maintenance Management System (MMS) Data
- Event Manager System (EMS) Data
- Spectrum RFI Tracking System (RFIT) Data

RFI Categories

→ Authorized Transmissions

→ Properly Licensed (i.e. FM, AM, TV)

→ Unauthorized Transmissions

→ Wireless Video Cameras

→ High Power Cordless Telephones

→ Unlicensed Pirate FM Stations Spurious

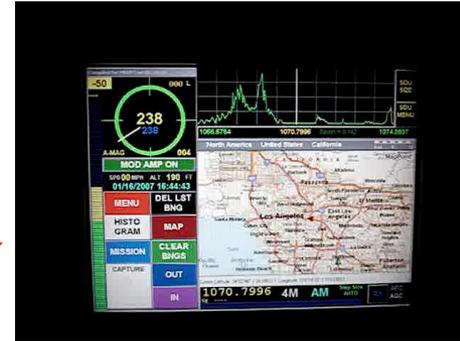

→ Intentional

→ Unauthorized Jamming 

→ “Phantom” Controllers 

→ Unintentional

→ Spurious Transmissions

RFI Sources

→ Citizens Band (CB) Radios (5th harmonic)

→ Paging Systems 

→ Stuck Microphone Transmissions

→ Cell phone Spurious Emissions

→ Electronic Attack (EA) Missions 

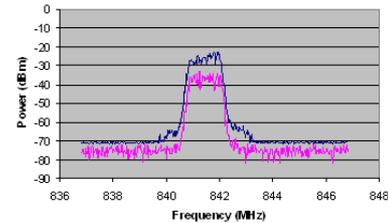

→ Power line Noise (Broadband Noise)

→ Wireless wide area networks

→ GPS/Cell phone jammers

→ Amateur "HAM" Radio

→ Land Mobile/Dispatch 

US National Airspace System RFI

→ **Most Common Source of RFI:**

- The “unknown source”
- Unauthorized Transmissions
- Pirate FM Broadcast Spurious

→ **Most Common FAA Victim:**

- VHF/UHF Voice Communications

→ **Most Difficult RFI to Resolve:**

- High Altitude Pilot Only Reported RFI
- Intermittent RFI (Airborne/Ground)
- Broadband RFI on Many Frequencies
- Phase Shift Keying RF Transmissions

US RFI Investigation Resources

- **FAA Personnel and Organizations:**
 - **ATO Spectrum Engineering Services**
 - Headquarters
 - Technical Center
 - Command Center
 - **Frequency Management Officers (FMO)**
 - Technical Operations Service Areas
 - Aeronautical Center
 - **Technical Support Field Specialists (Technicians)**
 - **Aviation System Standards (Flight Inspection)**
 - One International FIO
 - Six National FIOs

Rel Tix2:		Sub Source:	None Found	Long:	-77.542733

Summary: Air Traffic personnel in Area 1 at the Washington ARTCC report that aircraft pilots indicate hearing again ticking noise interference on sector ZDC04 frequency 133.975 MHz regardless of the controllers equipment in use. ATSS COMM specialists have been notified and will contact Spectrum for investigation support.

Notes: UPDATE: 11/06/2014 11:47 AM- Mike Gooden, not sure if you been following this issue. It seems to only happen at night just after Zulu. The data is a little confusing. If you won't mind checking this out some night the search area is split. The most obvious area is Baltimore NW to EMI. Looks like I795 to Northwest
