CAPACITY & EFFICIENCY

# CATÁLOGO DE DATOS AERONÁUTICOS

Raúl A. Martínez Díaz

*RO AIM - Oficina NACC OACI*

Ciudad de México, 3 al 5 de septiembre 2019

# Adopción de la Enmienda 40

“Esta última decisión del Consejo de la OACI ahora permitirá que las operaciones de Transporte Aéreo Mundial completen la transición de procesos heredados de AIS centrados en productos y en papel, a un entorno AIM totalmente centrado en datos para la Aviación Civil Mundial”

*Presidente del Consejo de la OACI Dr. Olumuyiwa Benard Aliu*

# El enfoque centrado del producto hasta hoy

OACI definió los **Productos Aeronáuticos Integrados**

El AISP mantuvo una **lista de proveedores de datos** para recopilar los datos necesarios para la producción.

El proveedor de datos **proporciona los datos solicitados al AISP**

# Carta a los Estados: La identificación y comprensión de lo que es realmente NUEVO es lo más importante

## AERONAUTICAL DATA REQUIREMENTS

### 4.1 Data Origination Requirements

#### 4.1.1- New text

4.1.2 The order of accuracy for aeronautical data shall be as specified in Annex 11, Chapter 2, and Annex 14, Volumes I and II, Chapter 2. In that respect, three types of positional data shall be identified: surveyed points (runway thresholds, navigation aid positions, etc.), calculated points (mathematical calculations from the known surveyed points of points in space/fixes) and declared points (e.g. flight information region boundary points).

*Editorial Note.* — 4.1.2 is relocated text from Annex 15, 3.3.1

4.1.3 World Geodetic System — 1984 (WGS-84) shall be used as the horizontal (geodetic) reference system for international air navigation. Consequently, published aeronautical geographical coordinates (indicating latitude and longitude) shall be expressed in terms of the WGS-84 geodetic reference datum.

*Editorial Note.* — 4.1.3 is relocated text from Annex 15, 1.2.1.1

Tel.: +1 514-954-8219 ext. 5872 | Ref.: AN 22.1.1-1/22 | 21 April 2017

Subject: Proposed amendment to Annex 15, new PANS-ADM and consequential amendments to Annexes 3, 4, 6, 9, 10, 11 and 14, PANS-ATM, PANS-OPS, PANS-ABC and PANS-Aerodromes

Action required: Comments to reach Montréal by 21 July 2017

Sir/Madam,

I have the honour to inform you that the Air Navigation Commission, at the sixth meeting of its 2016th Session held on 1 December 2016, conducted a preliminary review of the proposals developed by the Aeronautical Information Service (AIS) to Aeronautical Information Management (AIM) Study Group (AIS-AIMSG) for the amendment of Annex 15 — Aeronautical Information Services, the new Procedures for Air Navigation Services — Aeronautical Information Management (PANS-ADM) and consequential amendments to Annex 3 — Meteorological Service for International Air Navigation, Annex 4 — Aeronautical Charts, Annex 6 — Operation of Aircraft, Part 1 — International Commercial Air Transport — Aeroplanes, Annex 9 — Facilitation, Annex 10 — Aeronautical Telecommunications, Volume 1 — Radio Navigation Aids and Volume 2 — Communication Procedures including those with PANS status, Annex 11 — Air Traffic Services, Annex 14 — Aerodromes, Volume 1 — Aerodrome Design and Operations and Volume 2 — Heliports, Procedures for Air Navigation Services — Air Traffic Management (PANS-ATM, Doc 4444), Procedures for Air Navigation Services — Aircraft Operations, Volume 1 — Flight Procedures and Volume 2 — Construction of Visual and Instrument Flight Procedures (PANS-COPS, Doc 8168), Procedures for Air Navigation Services — ICAO Abbreviations and Codes (PANS-ABC, Doc 8400) and Procedures for Air Navigation Services — Aerodromes (PANS-Aerodromes, Doc 9981). The Commission authorized the transmission of the proposals to Contracting States and appropriate international organizations for comments.

The background of the aforementioned proposals for the amendment is explained in Attachment A. The proposals for amendment of Annex 15, the new PANS-ADM and the consequential amendments to multiple Annexes and PANS are presented by subject in Attachments B to V. To facilitate your review of the proposed amendments, the rationales for the amendments have been provided in a text box immediately following each proposal. The aeronautical data catalogue, which forms part of

Doc 10066

PANS - Aeronautical Information Management

1<sup>st</sup> Edition

This File will be ATN File 10066 when approved by the Council on 14 April 2017 and will be available for publication on 15 November 2017.

INTERNATIONAL CIVIL AVIATION ORGANIZATION

# Comprender el enfoque centrado en los datos

Los requisitos operativos impulsan la necesidad de productos de información aeronáutica (incluidos los conjuntos de datos)

Los estados validan en términos de alcance y DQR los datos requeridos que se recopilan

Los datos requeridos se describen en términos de alcance, fuente responsable y DQR y se entregan

# Procedimientos para los servicios de navegación aérea de la gestión de la información aeronáutica de (PANS-AIM Doc. 10066)

Todo es sobre:

- Soporte GANP/ASBU
- Prioridad no. 1 = PBN (RNP)
- CDO, CCO, AMAN/DEMAN
- Rendimiento de la aeronave.
- Procedimientos de reducción de ruido

✓ Para eso necesitamos la AIM digital

Aeronautical Data Catalogue

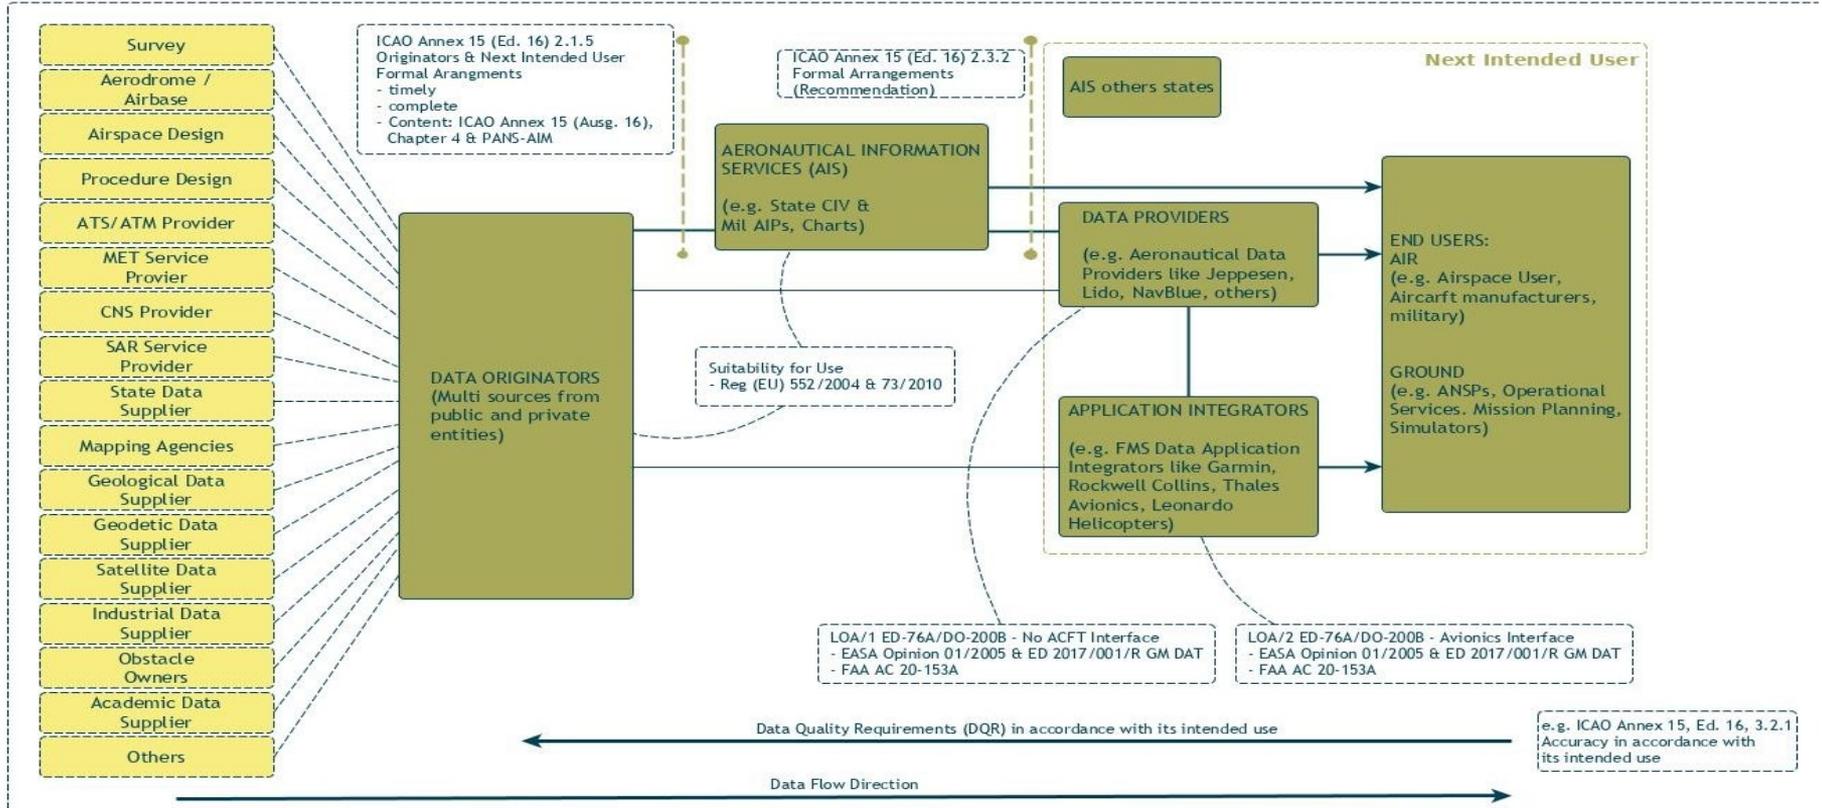

Table A 1-1 Aerodrome/Heliport data

Subject	Property	Sub-Property	Type	Description	Note	Accuracy	Integrity	Orig Type	Pub. Res.	Chart Res.
Runway				A defined rectangular area on a land aerodrome prepared for the landing and take-off of aircraft. (Annex 14)						
	Designator		Text	The full textual designator of the runway, used to uniquely identify it at an aerodrome/heliport. E.g. 09/27, 02R/20L, RWY 1.						
	Nominal length		Distance	The declared longitudinal extent of the runway for operational (performance) calculations.		1 m	critical	surveyed	1 m or 1 ft	1 m
	Nominal width		Distance	The declared transversal extent of the runway for operational (performance) calculations.		1 m	essential	surveyed	1 m or 1 ft	1 m
	Geometry		Polygon	Geometries of RunwayElement, RunwayDisplacedArea and RunwayIntersection						
	Centre line points									
		Position	Point	The geographical location of runway centre line at each end of the runway, at the stopway and at the origin of each take-off flightpath area, and at each significant change in slope of runway and stopway	Definition from Annex 4 3.8.4.2	1 m	critical	surveyed		
		Elevation	Elevation	The elevation of the corresponding centre line point.		0.25 m	critical	surveyed		
		Geoid undulation	Height	The geoid undulation at the corresponding centre line point						
	RWY exit line									
		Exit guidance line	Line	The geographical location of the runway exit line		0.5 m	essential	surveyed	1/100 sec	1 sec
		Colour	Text	Colour of runway exit line						
		Style	Text	Style of runway exit line						
		Directionality	Code List	Directionality of RWY exit line (one-way or two-way)						
	Surface type		Text	The surface type of the runway defined as specified in Annex 14 Volume I						
	Strength									
		PCN	Text	Pavement classification number						
		Pavement type	Text	Pavement type for aircraft classification number — pavement classification number (ACN-PCN)						
		Subgrade category	Text	Subgrade strength category						

- ✈ El Catálogo de datos aeronáuticos presenta el alcance de **los datos y la información** que una organización AIS puede recopilar y mantener.
- ✈ El Catálogo de Datos Aeronáuticos:
  - ✈ simboliza el cambio de entornos centrados en el producto a entornos **centrados en los datos**,
  - ✈ se considera el punto de referencia para todas las disposiciones relacionadas con la creación y publicación de datos aeronáuticos y
  - ✈ representa **el lenguaje común** para los originadores de datos y las organizaciones AIS.

Asegura el **alcance de los datos estatales** al recopilar todos los datos necesarios y los requisitos de calidad

Marco regulatorio establecido con **responsabilidades definidas para los creadores, proveedores de servicios y la autoridad del Estado**, incluyendo la Asignación de costos

Facilita la **comunicación** entre la OACI y el Estado, así como entre las partes en el Estado.

Enfoque de catálogo de datos armonizado a nivel global para **habilitar AIM y SWIM centrados en datos**

Apoya las **mejores prácticas**

## Prerrequisitos de los Estados

- Incluya VFR y datos militares para cubrir todos los elementos de datos del Estado
- Incluya DQR para todos los datos, incluidos los datos requeridos por el estado (datos adicionales, diferencias DQR)
- Hacer que el Catálogo de datos sea evaluable para todos (con excepción de los datos militares restringidos)
- Permita una cadena de datos aeronáuticos estatales totalmente digitales y de calidad garantizada

## El Catálogo de Datos Aeronáuticos en PANS-AIM:

- Proporciona una descripción de los datos aeronáuticos
- define los requisitos de calidad de los datos
- Consolida los datos aeronáuticos que un AIS recopilará y mantendrá
- Facilita arreglos formales
- Permite extensiones nacionales y regionales
- **no es solo un SARP de la OACI, sino una herramienta para facilitar su trabajo**

# ¡No espere, comience e implemente el Catálogo de Datos!

Sus opciones ...

- ✓ impleméntelo **usted mismo** utilizando el modelo de catálogo de datos de la OACI y siga las mejores prácticas
- o
- ✓ implementarlo con la ayuda de **alguien experimentado** utilizando el modelo de catálogo de datos de la OACI
