

Dates:	1-3 October 2019
Location:	ICAO NACC Regional Office, Mexico City, Mexico
Duration:	Three days of sessions
Language:	English and Spanish (simultaneous interpretation)
Speakers:	Subject Matter Experts from the NAM and CAR Regions and aviation industry representatives with experience in SeMS implementation.
Participants:	Up to 80 participants

Workshop format

The Workshop will combine presentations, case studies and discussions. The Workshop will encourage and facilitate the exchange of experiences and good practices between participants.

Objectives

- Awareness and promotion of Security Management Systems (SeMS) principles.
- Alignment with the ICAO Global Aviation Security Plan (GASeP).
- Business-like approach to Security (e.g. corporate commitment, resources management).
- Quality control and quality assurance, definition of Key Performance Indicators (KPIs).
- Share experiences and identify best practices for SeMS implementation.

Who should attend?

The Workshop is open to ICAO Member State representatives and industry partners, particularly those individuals who have a security responsibility at airlines, airports and third-party contractors.
