1 Acronyms and Definitions

Acronym	Definition
AIP	Aeronautical Information Publication
ARP	Aerodrome Reference Point
ATS	Air Traffic Services
ATT	Along Track Tolerance
Baro-VNAV	Barometric vertical navigation
CTA	Control Area
DA	Decision Altitude
DB	Data Base
DH	Decision Height
ENR	Enroute
FAF/P	Final Approach Fix/ Point
FPDAM	Flight Procedure Design and Airspace Manager
FTA	Fix Tolerance Area
HG	Height Gain
Heq	Equivalent Height
IAF	Initial Approach Fix
IAS	Indicated Air Speed
ICAO	International Civil Aviation Organization
IF	Intermediate Fix
ILS	Instrument Landing System
KK'	Earliest TP tolerance. It is a main reference to evaluate a missed approach obstacle in the turn area, when a turn at a given fix is defined.
Kt	Knots
LDA	Localizer type Directional Aid
LNAV	Lateral Navigation: The minima line on the chart for RNP Approaches without vertical guidance
LNAV/VNAV	The minima line based on Baro-VNAV system performances that can be used by aircraft approved according to AMC 20-27 or equivalent. LNAV/VNAV minima can also be used by SBAS capable aircraft
LPV	Localizer Performance with Vertical Guidance: the minima-line based on SBAS performances that can be used by aircraft approved according to AMC 20-28 or equivalent
MA	Missed Approach
MAPt	Missed Approach Point
MAF	Missed Approach Fix
MAHF	Missed Approach Holding Fix
MEA	Minimum En-Route Altitude
MHA	Minimum Holding Altitude
MOC	Minimum Obstacle Clearance
MSD	Minimum Stabilization Distance
NA	Nominal Altitude
NM	Nautical Miles
OAS	Obstacle Assessment Surface
OCA/H	Obstacle Clearance Altitude/ Height

PBN	Performance- Based Navigation. The PBN concept specifies Navigation Specifications in terms of navigation system performance accuracy, integrity and continuity along with the functionality required onboard an aircraft for the proposed operations
PT	Path & Terminator
RA	Required Altitude
RDH	Reference Datum Height (for APV or Precision Approaches)
RNAV	A rea Navigation
RNP	Required Navigation Performance
RWY	Run wa y
SBAS	Space Based Augmentation System
SDF	Step Down Fix
SOC	Start Of Climb
THR	Threshold
TMA	Terminal Control Area
WPT	Way poin t
XML	E xtensible Markup Language

2 Input Data

Software used for the design (Name and version)	
References for design criteria applied (ICAO Documentation)	
References for data criteria applied (ICAO Documentation)	
Data sources (Aeronautical Information Publications)	
Reference coordinate system (Datum)	
Unit of measure (Distance/High/Angle)	
Terrain data sources	
Obstacle data sources	

3 Design Criteria and Assumptions

This chapter reports assumptions and criteria followed in the design of the instrument flight procedures described in this document.

- 1) The flight procedures segments were designed in true degrees and converted in magnetic values by applying X.XX° magnetic variation.
- 2) The study described in this report includes the construction of all the procedures elements involved in the STAR design and their respective protection areas.
- 3) Determination of Minimum Stabilization Distances and Minimum segment length have been assessed according to the provisions of ICAO Doc 8168,Part III, sec. 2, ch. 1, par. 1.4 (Minimum Stabilization Distance) and 1.5 (Determination of the minimum length of a RNAV segment limited by at least one waypoint which is not a turning point).
- 4) Vegetation applied: XXXFT
- 5)

4 Aeronautical Data

Aeronautical data reported in this section, considered as significant input to the procedures design activity, were provided by the XXX Authorities.

Airport Information	
Airport Name	ABU DHABI / AL BATEEN EXECUTIVE AIRPORT
ICAO Identifier	OMAD
A/D Elevation	16.00 FT
ARP Latitude	242542.0000N
ARP Longitude	0542729.0002E
Magnetic Variation (year)	2.0° E (2017)
Aircraft Categories	A/B/D/C

Threshold Information		
Threshold	Coordinates	Elevation (FT)
13	N 24 26 03.40 E054 26 59.60	13.00
31	N 24 25 18.90 E054 28 01.80	13.00

Approach and Runway Lighting Information (PAPI)	
MEHT	ANGLE

5 WAYPOINTS

In the table below, the waypoints used in the procedure design, both existing and new, are listed with their role, identification and coordinates.

ROLE	IDENT	Coordinates
LTP/FTP	AD005	N 24 25 18.90 E 054 28 01.80
OTHER	AD301	N 24 23 57.21 E 054 38 09.30
IAF	ALB	N 24 26 19.30 E 054 26 46.70
OTHER	BORIM	N 24 36 34.00 E 054 11 53.00
FAF	KHALL	N 24 19 58.29 E 054 35 29.29
IAF	MIPIP	N 24 14 15.00 E 054 43 28.00
MAPT	RWY31	N 24 25 18.90 E 054 28 01.80
IF	THEON	N 24 16 53.53 E 054 39 48.53
IAF	TYRIO	N 24 20 33.36 E 054 42 55.25
OTHER	TYRIO	N 24 20 33.36 E 054 42 55.25

6 P/R/D Zones

In the table below the P/R/D Zones (if present) taken into account in the project.

P/R/D Zone		
ID	VERTICAL LIMITS	REMARKS

7 NOTAM

NOTAMs		
NOTAM ID	INTEGRATED	REMARKS
		<i><report "N NOTAM" if there isn't any NOTAM to take into account></i>

8 Procedure Overview
