

Runway Safety Team

Airport:

Interview with Pilots Operating at the Airport

National Airlines

Items:

1. In the opinion of the pilot, what level of safety would you assign to the airport? On a scale of 0 to 10, what rating would you give to this airport?
2. If the airport receives a score lower than 10, ask what should be implemented by the airport to get closer to the maximum score;
3. Is the airport aeronautical information duly published on the web?
(If not, what is not correct or what information should be added?)
4. Has the pilot ever identified a hotspot when he/she is in a taxiway through the airport?
(If so, write the items on the airport letter)
5. Is there any spot in the airport maneuver area where the pilot would have difficulty defining his/her position (situational awareness)? (If so, write the spot/spots)
6. Does the pilot consider that the visual aids at this airport operate properly?
(If not, what aid is missing or needs modification?)
7. Has there ever been a deviation or overshoot during landing or takeoff or a hazard?
(If so, please provide details of the occurrence and whether the incident was reported)
8. Was there any hazard of a runway incursion during the taxiway approach?
(If so, please mention the details of the occurrence)
9. Is communication with TWR always clear and comprehensible?
(If not, list the items that could improve).
10. Ask the pilot if he/she would like to comment on airport runway safety.
