Agenda

THE ULTRA
EQUATION

- Introduction (context) and Key Themes
- Airport Systems that enable A-CDM
- Evolution of Airport Systems Integration
- Benefits to Airports, Airlines, Passengers, Ground Handlers
- Details and Case Studies (Dublin and Lima)
- Questions

Introduction

THE ULTRA
EQUATION

Jim Houghton, Head of Business Development

Enabling improvements for airports and airlines across 5 continents

World's Best Airports

THE ULTRA
EQUATION

2016 SkyTrax Airport Awards™

BEST AIRPORTS BY REGION

BEST AIRPORT: NORTHERN EUROPE

Helsinki-Vantaa

BEST AIRPORT: EASTERN EUROPE

Budapest

BEST AIRPORT: WESTERN EUROPE

London Heathrow

BEST AIRPORT: AFRICA

Cape Town

BEST AIRPORT: ASIA

Singapore Changi

BEST INTERNATIONAL AIRPORT: CHINA

Beijing Capital

BEST DOMESTIC AIRPORT: CHINA

Shanghai Hongqiao

BEST AIRPORT: RUSSIA/CIS

Moscow Domodedovo

BEST AIRPORT: NORTH AMERICA

Vancouver

BEST AIRPORT: SOUTH AMERICA

Lima – Jorge Chavez (2009-2015)

BEST AIRPORT: C AMERICA/CARIBBEAN

Panama Tocumen

BEST AIRPORT: MIDDLE EAST

Doha Hamad

BEST INT'L TRANSIT AIRPORT

Seoul Incheon

WORLD'S TOP 10 BEST AIRPORTS

- #1 Singapore Changi
- #2 Incheon, S Korea
- #5 Hong Kong
- #7 Zurich
- #8 London Heathrow
- #10 Doha Hamad

Industry Activities

WORLD AIRPORT AWARDS

FM01603

V3 Certified

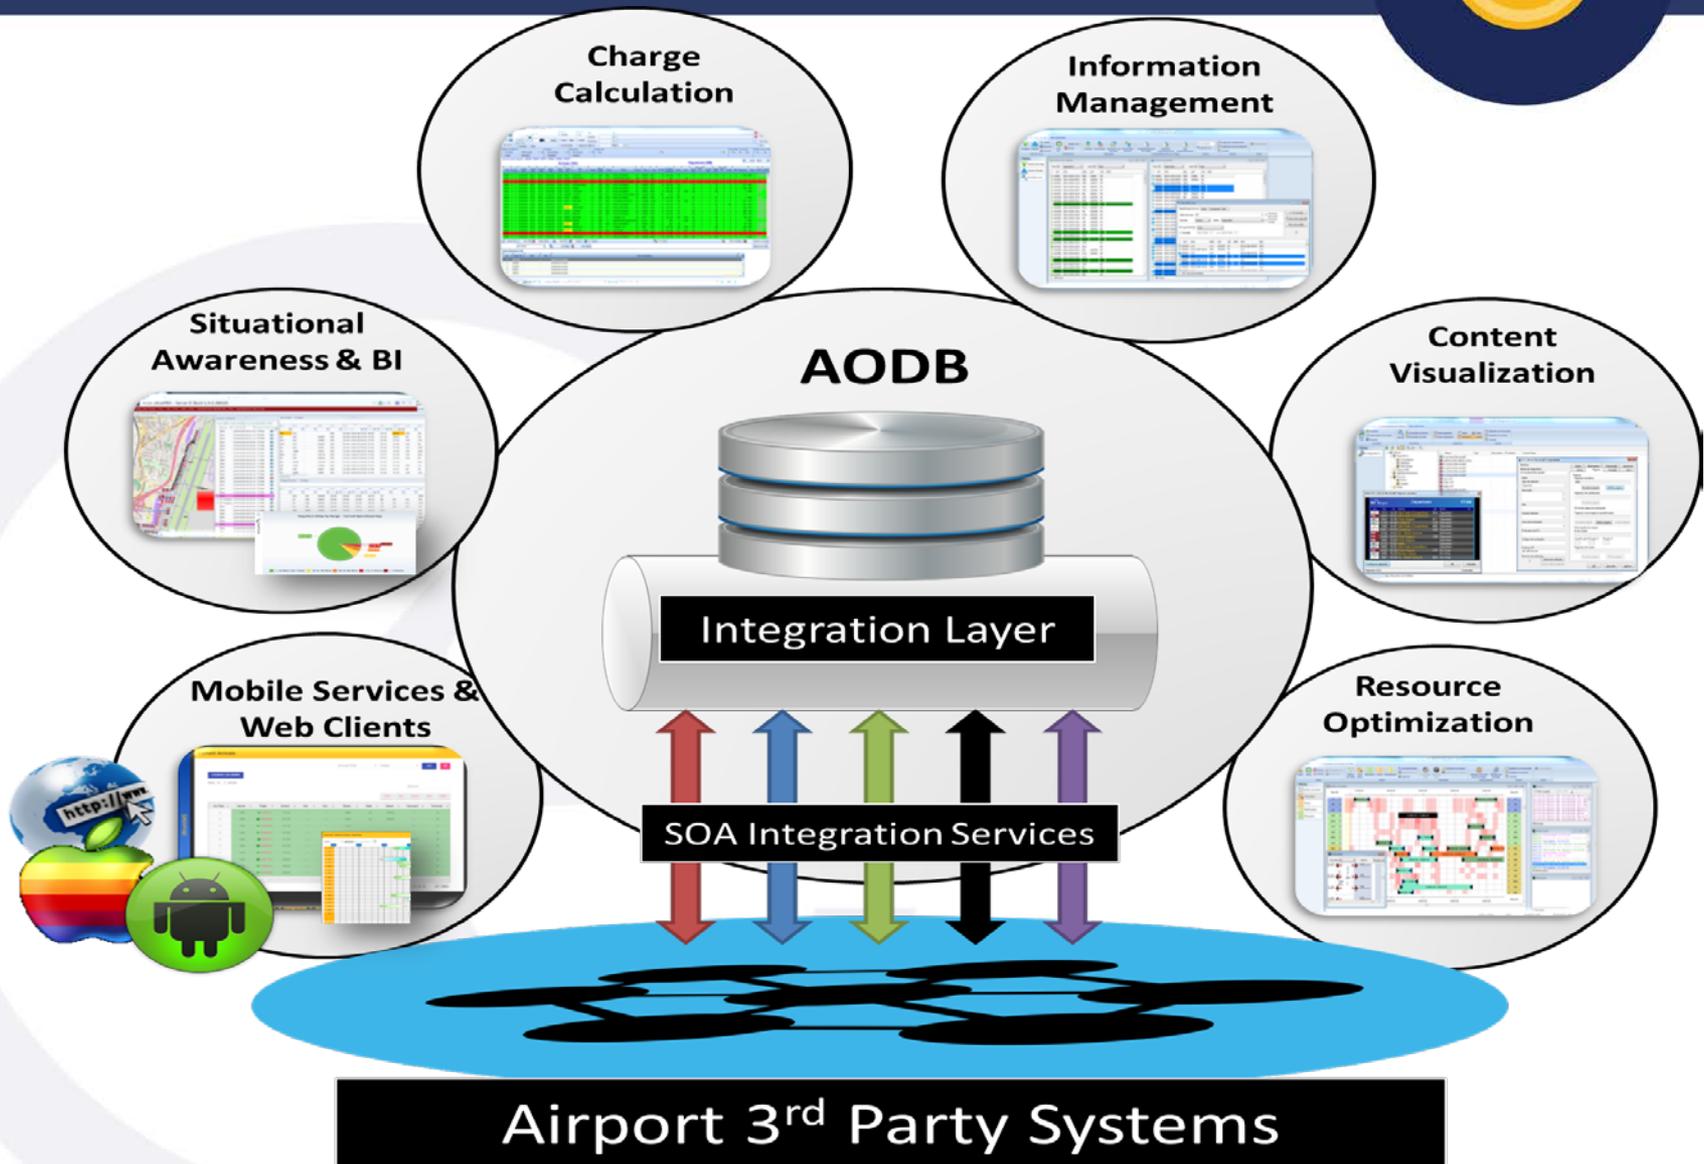

Key Themes

- This is fun!
- A-CDM starts in the parking lot
- You have to walk before you can run
- It's all about data flow and sharing information
- The 90% rule

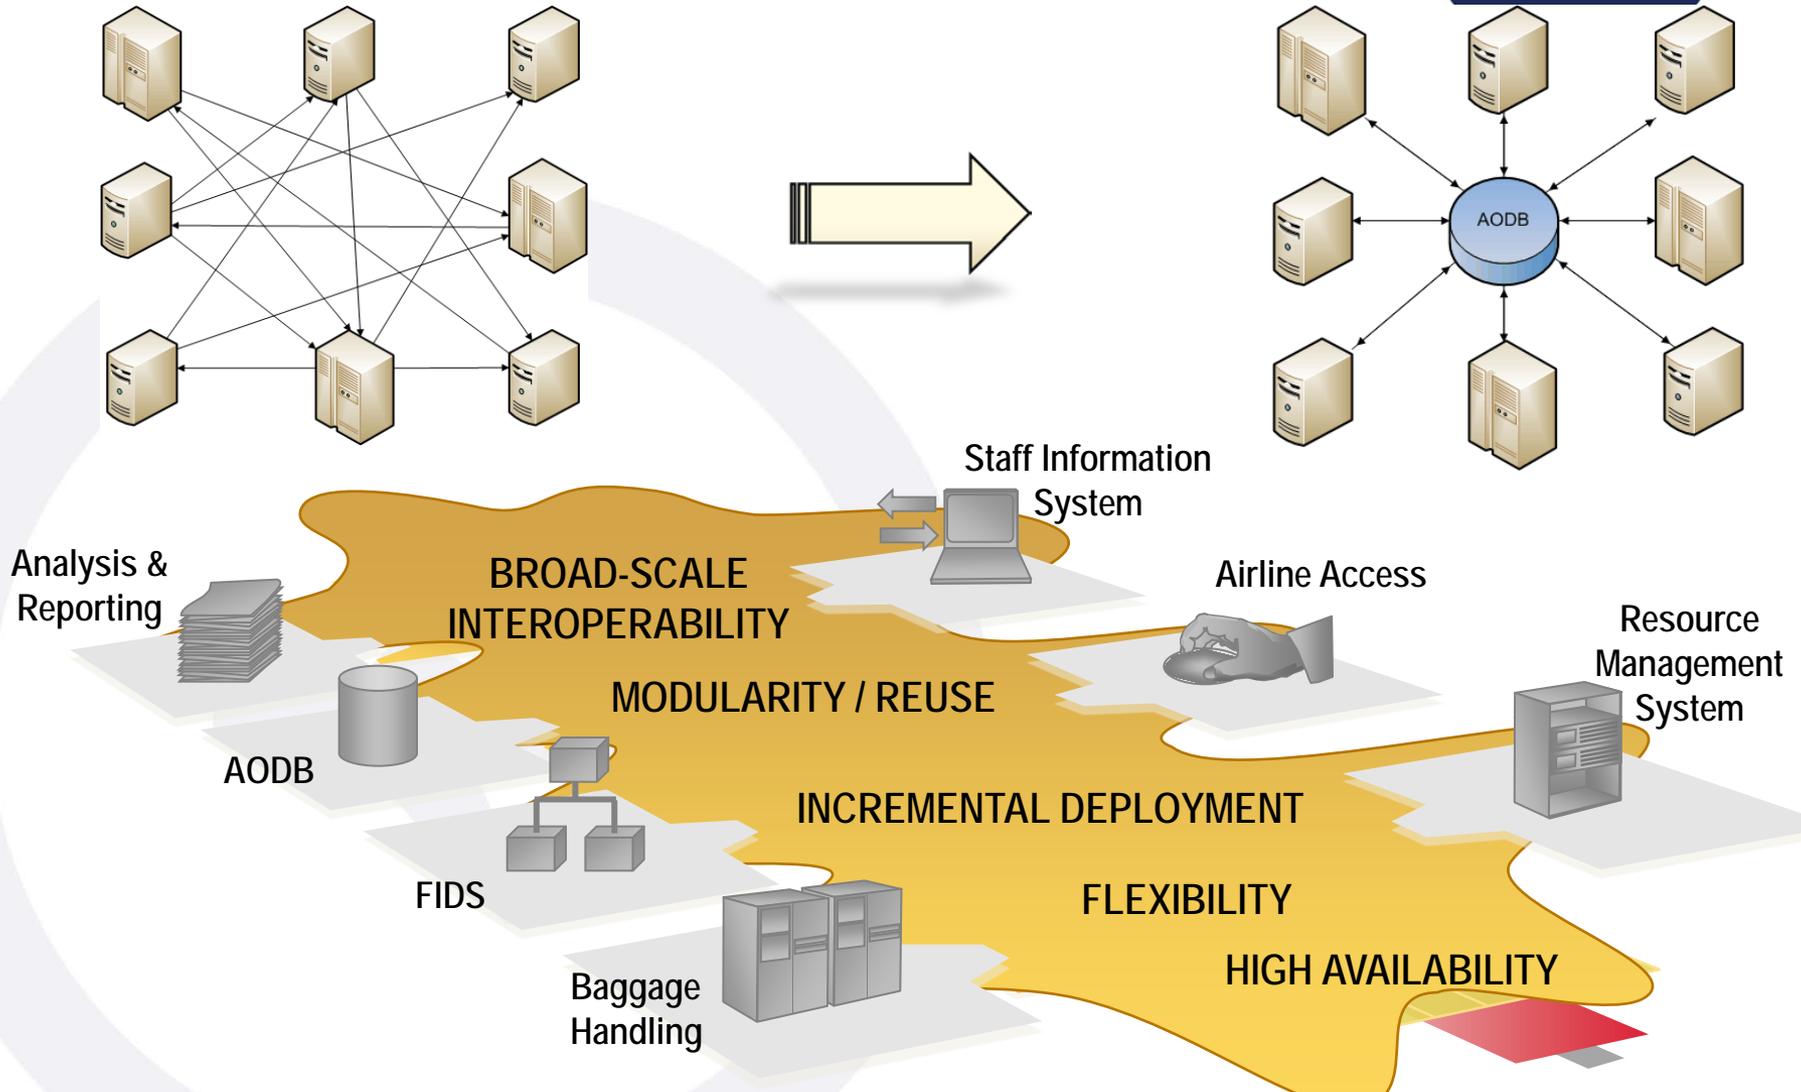

Airport Systems and Functions

THE ULTRA
EQUATION

Evolution of Airport Systems Integration

THE ULTRA EQUATION

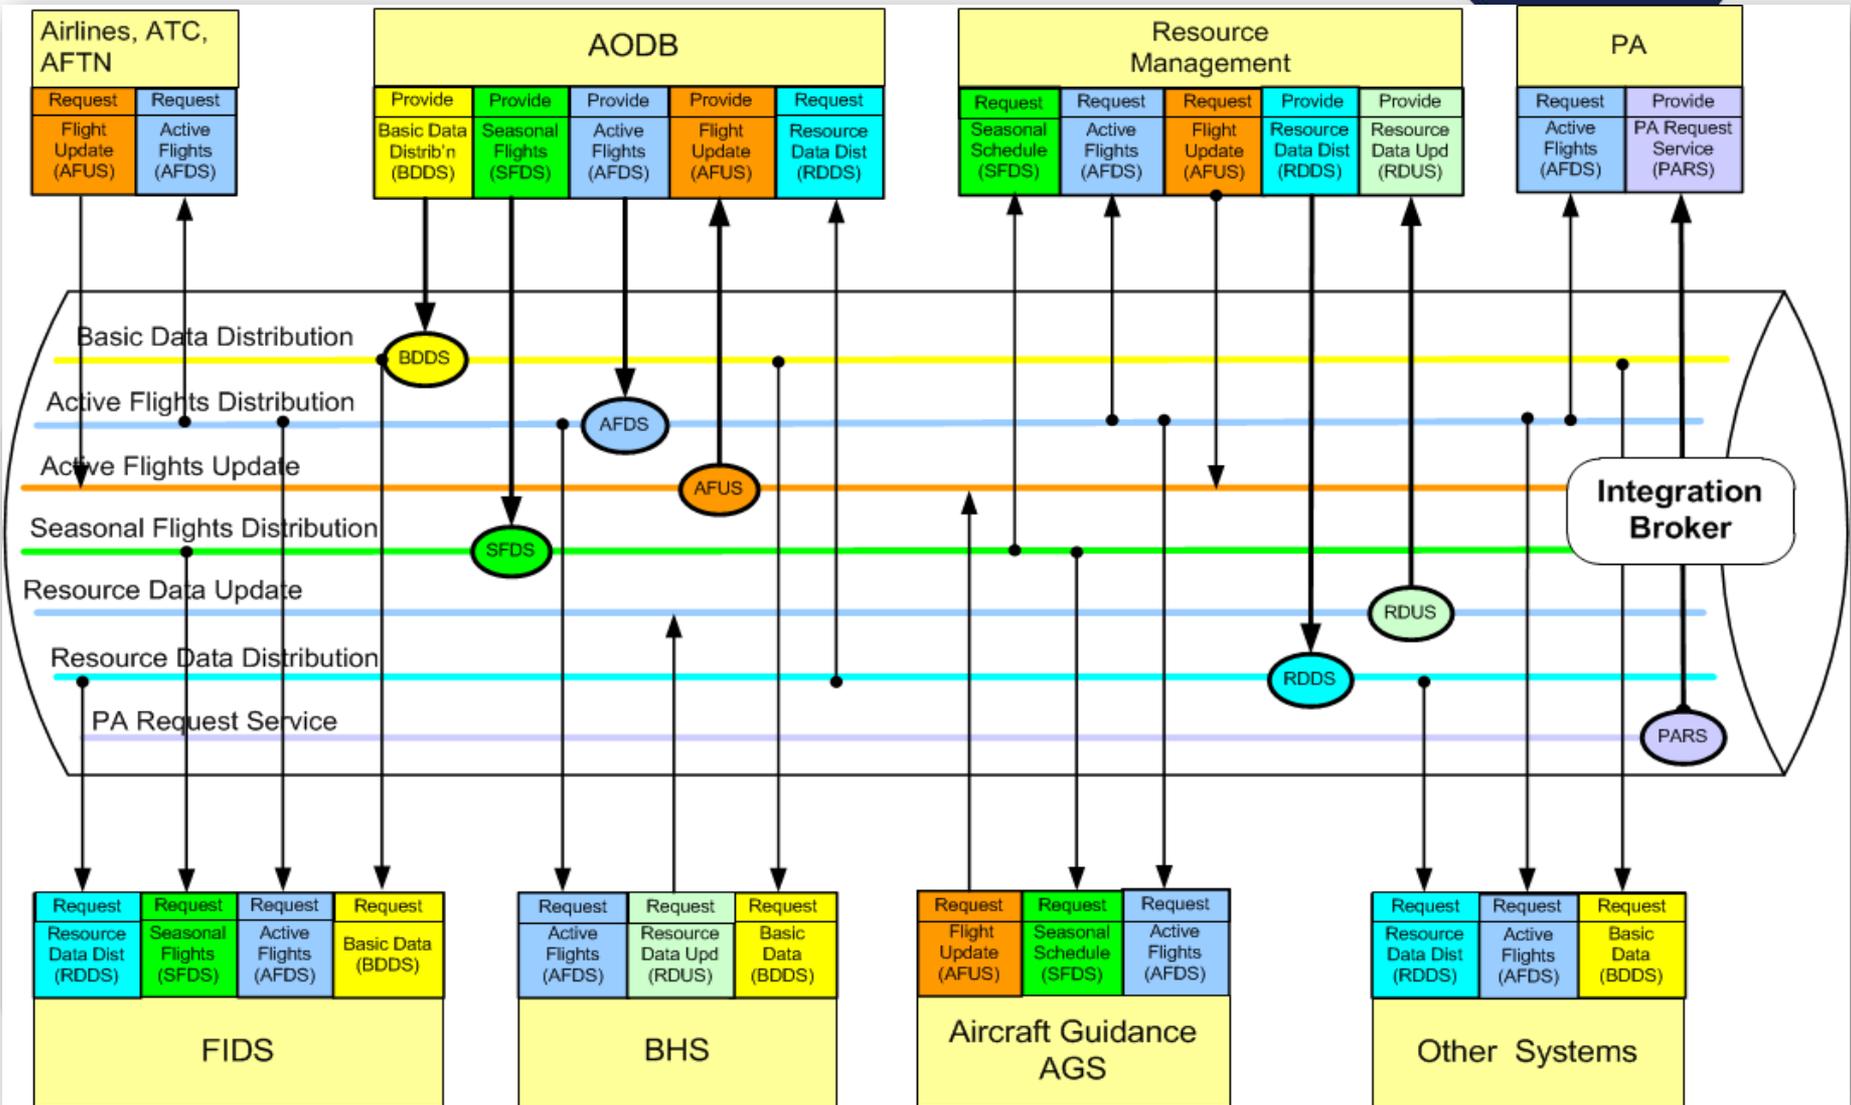

What is an Integration Platform?

THE ULTRA
EQUATION

- A robust, **flexible, scalable** and highly reliable information broker that enables systems to “talk” to each other
- Secure, **actively managed** platform that complies with industry best practice architectures, standards and processes
- “**Loose coupling**” of interfaces allowing easy replacement of systems
- Visibility and **guaranteed delivery** of airport operational data
- A **cost effective** and future proofed solution providing reliable integration with many vendors on and off airport

Who needs Data? Who has Data?

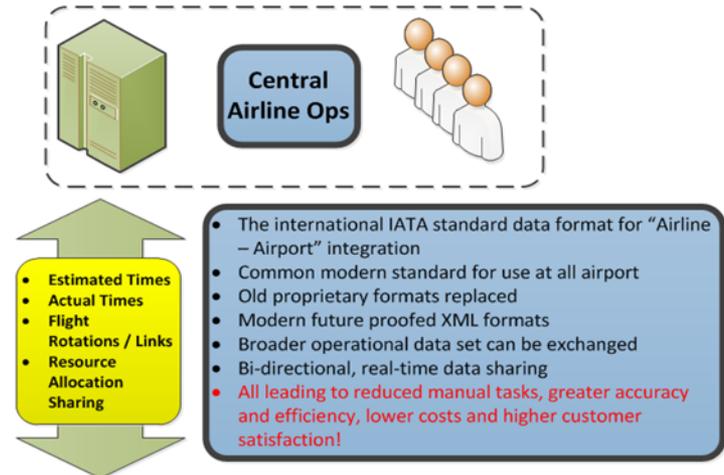

Benefits of Integration

- **Information can be shared** - with agencies and authorities, between airlines and airports, ground handling companies and **passengers**
- **More capacity** – fuller use of terminal and runways
- **Accurate up-to-date data** – direct system communications mean less errors/confusion, better access to accurate data, better decisions made earlier, improved staff efficiency, more responsive actions, overall a happier customer
- **Better Service and Efficiency** – reduces tedious tasks, reduces conflicts and stress, frees staff for more meaningful work
- **Expandability** – without good system integration, the interactions and problems between the growing airport departments and companies increase exponentially
- **Re-useable** – making the right decision now makes it easier and reduces costs in the future

IATA AIDX a standard designed for Airline integration

<http://www.aidx.aero/Overview.aspx>

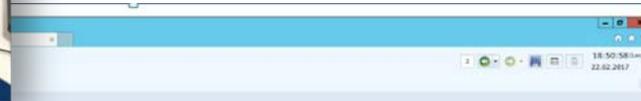

Local Airline / Handling Agent Operations

Local Airport Operations
E.g. Resource (Stand) Allocations, ATC input

Integration Enables A-CDM

Aircraft Flow Management

Case Study: Dublin 2008

- 3 services, 10 clients

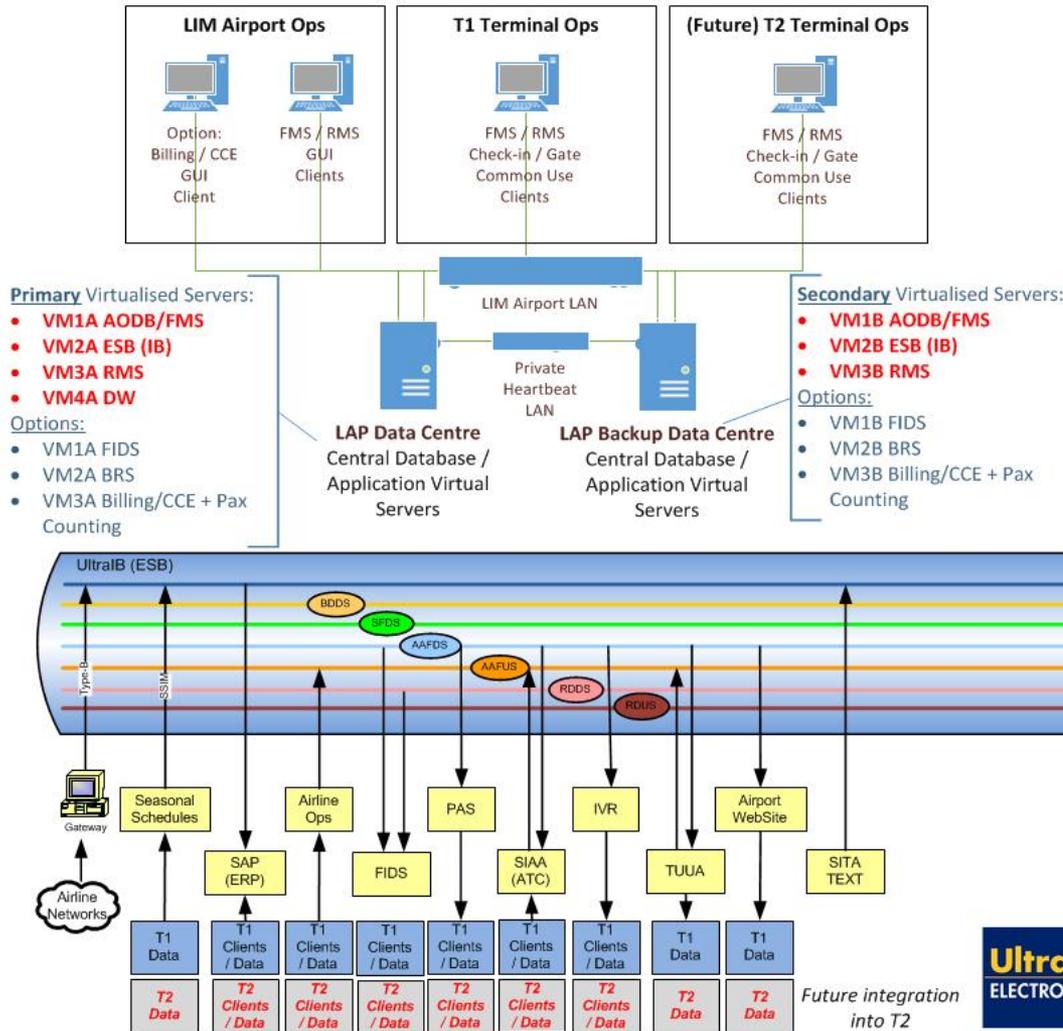

THE ULTRA EQUATION

Logical Flows between Systems using IB Services

Case Study: Lima

Jorge Chávez International Airport, Peru

- Common AIS platform
- Reusable Integration Services
- Airport-wide & Terminal specific configuration
- Separate Airport & Terminal Operations Centres
- Dual data centres

Airport Systems Integration

- Experience Required

THE ULTRA
EQUATION

Summary

- A robust, flexible, scalable and highly reliable information broker that enables **systems to “talk” to each other**
- Secure, actively managed platform that complies with industry **best practice architectures, standards and processes**
- “Loose coupling” allowing **easy replacement of systems**
- **Visibility** and guaranteed delivery of airport operational data
- Expansion through addition of services and clients over time **to enable A-CDM**
- A cost effective and **future proofed** solution providing reliable integration with many vendors on and off airport
