

CyberTracker and Windows Mobile: An inexpensive solution for electronic wildlife control data collection

Dr. Nicholas Carter
Birdstrike Control Program

What is CyberTracker?

- Designed by conservationists for illiterate trackers in Africa
- Allows users to design an application specific to location and collection needs
- Effective means of utilizing data
- Extremely versatile
- Used by professionals & amateurs, in fields ranging from conservation to disaster relief, on almost every continent.

Splendid Pagoda
Mimetes splendens

DESCRIPTION

An erect shrub 1-2 m tall, with many erect stems arising from a large underground rootstock. Leaves oblong-elliptic, hairless, 25-55 mm long, 5-20 mm wide. Flowerhead cylindrical, 60-100 mm long, 40-70 mm across, topped by a coma of flat, red, reduced leaves. Headlet with 4-7 flowers, subtended and clasped from above by a red-orange, cowl-shaped leaf. Stems 45-50 mm long, red. Flowers

System Set Up and Devices Needed

- CyberTracker Software
 - Download is free from:
<http://www.cybertracker.co.za/>
- Device Driver (i.e. Windows Mobile)
- Portable Device w/ GPS Capability: PDA, Smartphone, Windows Mobile Computer, etc.
- PC (not compatible with Macintosh systems)
