

**Agenda Item 1:      Implementation of the provision of electronic terrain and obstacle data (e-TOD)**

**PROJECT G1 – IMPLEMENTATION OF THE PROVISION OF  
ELECTRONIC TERRAIN AND OBSTACLE DATA (E-TOD)**

(Presented by the Secretariat)

**SUMMARY**

Project G1 “Implementation of the provision of electronic terrain and obstacle data (e-TOD)” has developed an Action Plan for the introduction of functional improvements in the provision of aeronautical information services. This working paper provides information on the progress made, and States must update this information in the corresponding Tables.

**References:**

- Annex 15 to the ICAO Convention.
- SAM/AIM/4 Multilateral Meeting.

<b>ICAO Strategic Objectives:</b>	<i>A - Safety</i> <i>C - Environmental protection</i>
-----------------------------------	--

1            **Background**

1.1            Project G1 “*Implementation of the provision of electronic terrain and obstacle data (e-TOD)*”, whose corresponding description and GANTT are shown in **Appendix A** to this working paper, developed an Action Plan for the introduction of functional improvements in the provision of aeronautical information services.

1.2            Likewise, a “Guide-Document on the Objectives of the e-TOD Project” was prepared, which refers to the background of e-TOD implementation in the States of the Region, and describes in detail the tasks to be performed for that implementation. It also addresses the economic aspects (elements to be considered when calculating costs) and the project timetable. Finally, it provides guidance on the conduction of the project risk analysis.

1.3            Likewise, a document on the “Technical and e-TOD Project Specifications” was prepared, mainly containing information on the technical aspects of e-TOD implementation. It provides plenty conceptual information on digital elevation models, obstacles, metadata, quality, etc.

1.4            As part of the tasks of the e-TOD project, a model was developed to establish Service Level Agreements (SLA) to receive aeronautical data and information under predefined criteria that

ensure that their inclusion in Aeronautical Information Management Systems will permit the delivery of information based on the quality criteria required to attain the ATM systems foreseen in the Global Air Traffic Management Operational Concept.

1.5 The products developed to assist SAM States in the implementation of the provision of electronic terrain and obstacle data (e-TOD), and which were analysed and approved at the meeting held within the framework of GREPECAS Project G1, are as follows:

- a) Guide-Document on the objectives of the e-TOD project
- b) Technical and e-TOD project specifications
- c) Model Service Level Agreement (SLA)
- d) Model list of data for SLAs

## 2 Discussion

2.1 According to information available to date, 4 States have a GIS or automated system for the integration of aeronautical information. At present, all SAM States have approved the Guide-Document. Two States -Argentina and Uruguay- have SLAs. SLAs are essential to ensure the quality of the data received by the aeronautical information services for their publication.

### *Analysis of the achievement of goals, based on G1 indicators/metrics*

- Percentage of States that have implemented GIS or automated systems.
- Percentage of States that have approved the Guide-Document with the Action Plan.
- Percentage of States that have established SLAs.

2013	% of States with automated or GIS systems = 28 %	% of States that have approved the Guide-Document with Action Plan = 100%	% of States that have established SLAs = 14%

2.2 This information needs to be updated in order to measure the progress made by the respective Administrations since the previous SAM/AIM meeting.

3. **Suggested action:**

3.1 The Meeting is invited to:

- a) take note of the information contained in this working paper;
  - b) review and elaborate on the description of AIM Project G1 and its corresponding GANTT as it may deem appropriate.

**APPENDIX A**

<b>SAM Region</b>	<b>PROJECT DESCRIPTION (DP)</b>		<b>DP N° G1</b>	
<b>Programme</b>	<b>Title of the Project</b>		<b>Start</b>	<b>End</b>
<b>AIM</b>  (ICAO Programme Coordinator: Roberto Arca Jáurena)	Implementation of the provision of electronic terrain and obstacle data (e-TOD) (SAM)  Project coordinator: Juan González (Uruguay )  Experts contributing to the project: SAM/AIM IG		26/09/11	31/12/15
<b>Objective</b>	Support the implementation of the provision of e-TOD by SAM States, and provide guidance to States on GIS acquisition and management.			
<b>Scope</b>	The scope of the project contemplates the assessment and identification of implementation levels associated to the provision of electronic terrain and obstacle data. It contemplates the drafting of an Action plan and guides for the implementation of e-TOD to support developments in the provision of electronic terrain and obstacle data for the evolution of digital terrain models (DTM) to gradually improve electronic aeronautical charts and other similar products, with the support of tools such as the geographical information systems (GIS).			
<b>Metrics</b>	<ul style="list-style-type: none"> <li>• Number of States that have implemented GIS or automated systems.</li> <li>• Guide-document with action plan approved.</li> <li>• Number of States that establish SLAs.</li> </ul>			

<b>Strategy</b>	The conduction of project activities will be coordinated among project members, the project coordinator, and the programme coordinator, mainly through teleconferences (GoToMeeting application) and meetings that may be held within other scheduled events, based on the activities of the work programme. The project coordinator will coordinate with the programme coordinator for the inclusion of additional experts, if warranted by the tasks and works to be executed. The results of the work done will be submitted to the consideration and review of State experts in the form of a final consolidated document for analysis, review, and approval, and for presentation to the GREPECAS PPRC by the programme coordinator.				
<b>Goals</b>	Draft the Guide-document containing the objectives of the e-TOD project. 2012. Define the technical and e-TOD project specifications. 2012. Prepare the document containing the e-TOD technical specifications. 2012. Guide on the acquisition of a geographical information system (GIS). 2012. GIS implementation Manual. 2012.				
<b>Rationale</b>	Compliance with the SARPs of Annexes 15 and 4 to facilitate the execution of performance-based air operations and to advance with the AIS-AIM Transition Roadmap. A close relationship with other projects is needed in order to obtain the operational requirements of the aforementioned applications and their respective tentative dates of implementation.				
<b>Related projects</b>	This project is related to Project G2 “Implementation of Aeronautical Information Exchange Systems (AIXM)” and Project G3 “Implementation of the Quality Management System in the AIM units” in the CAR/SAM States.				
<b>Project deliverables</b>	<b>Relationship with the performance-based regional plan (PFF)</b>	<b>Responsible party</b>	<b>Status of implementation*</b>	<b>Delivery date</b>	<b>Comments</b>
Survey on the status of eTOD implementation.	PFF: SAM AIM/02	Juan González Uruguay		30/11/2011	Finalised on schedule.

Generate follow-up report.	PFF: SAM AIM/02	Juan González Uruguay		30/04/2012	Finalised on schedule.
Develop Guide-Document with the objectives of the eTOD project.	PFF: SAM AIM/02	Juan González Uruguay		30/09/2012	Finalised on schedule. Delivered 30/09/2012
Define the technical specification of the eTOD project.	PFF: SAM AIM/02	Juan González Uruguay		30/09/2012	Finalised on schedule. Delivered 30/09/2012
Develop the document with the eTOD technical specifications.	PFF: SAM AIM/02	Juan González Uruguay		30/09/2012	Finalised on schedule. Delivered 30/09/2012
Guide for the acquisition of a geographical information system (GIS).	PFF: SAM AIM/01	Juan González Uruguay		09/03/2012	Finalised on schedule.
GIS implementation manual.	PFF: SAM AIM/01	Juan González Uruguay		09/03/2012	Finalised on schedule.
Conduct seminars for eTOD specialists, describing the plans and expected operational and economic benefits.	PFF: SAM AIM/02	ICAO coordinator		30/09/2014	
Develop a training programme and documentation for eTOD operators.	PFF: SAM AIM/02	Juan González Uruguay		31/10/2014	
<b>Resources required</b>	Designation of experts in the execution of some of the deliverables. More commitment by States to support the designated Coordinators and experts.				

*\*Grey**Task not started**Green**Activity underway as scheduled**Yellow**Activity started with some delay but expected to be completed on time**Red**It has not been possible to implement this activity as scheduled; mitigating measures are required*

Timetable in MS Project with the tasks, sub-tasks, deliverables, and responsible parties
