«Border control specialists training»

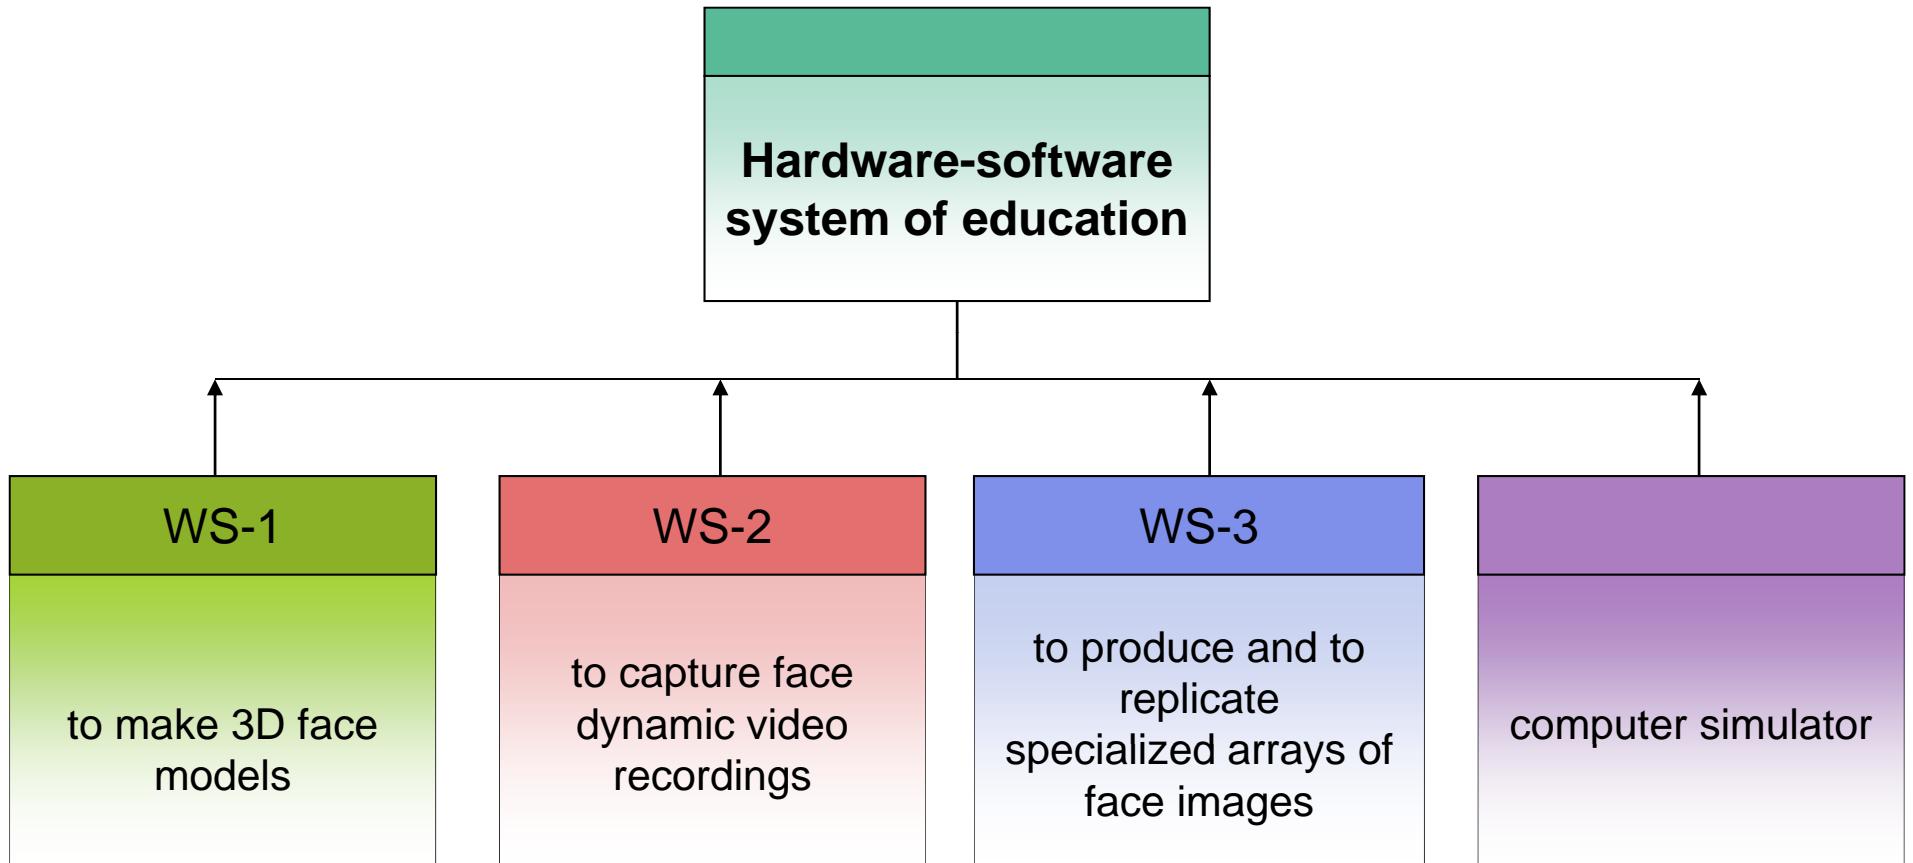

Distribution of border checkpoints on the kinds of international communications

(for the date 01.06.2011)

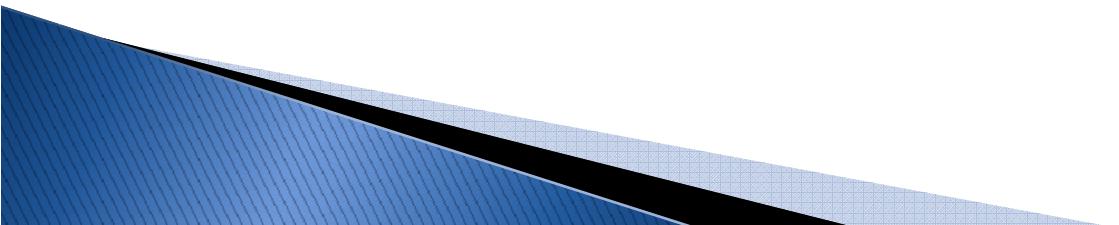

The structure of system «Visit»

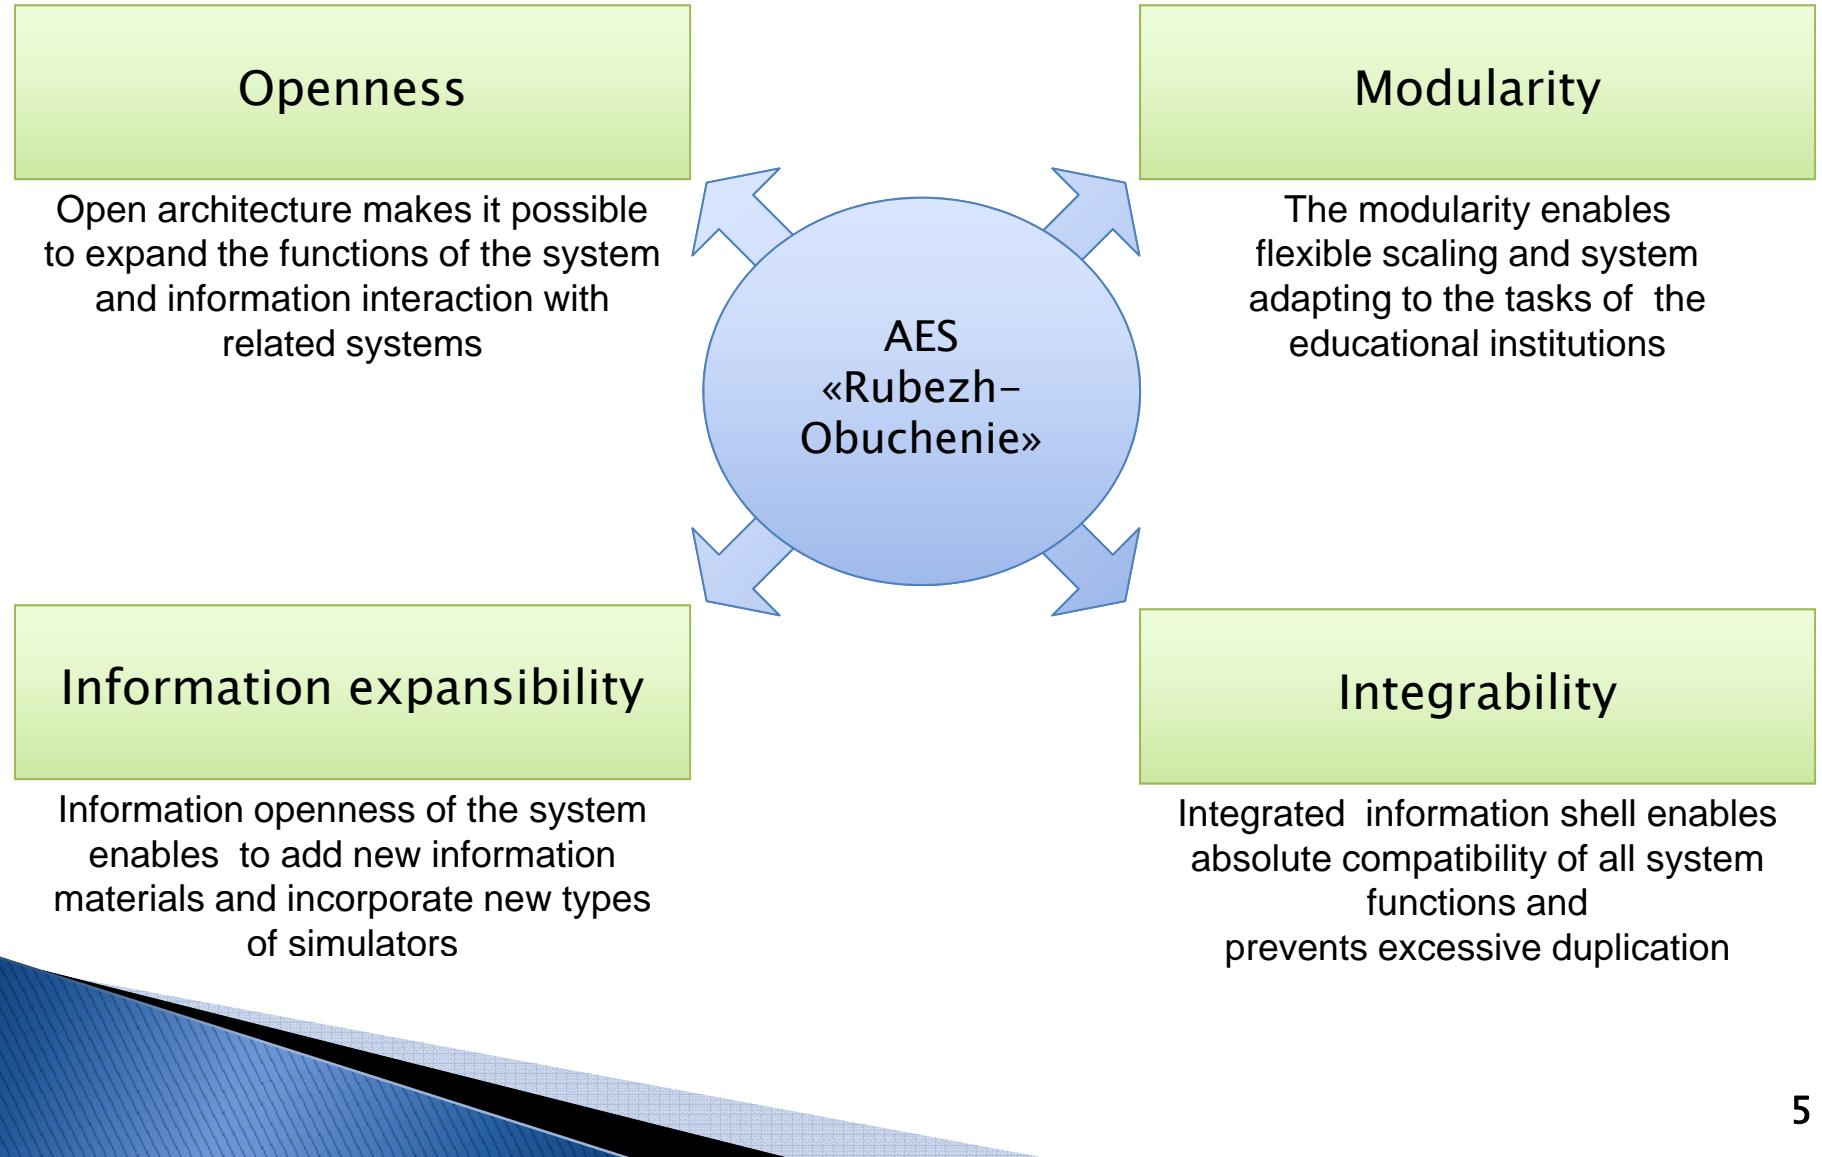

Note. WS – work station

Purposes of Automated Education System

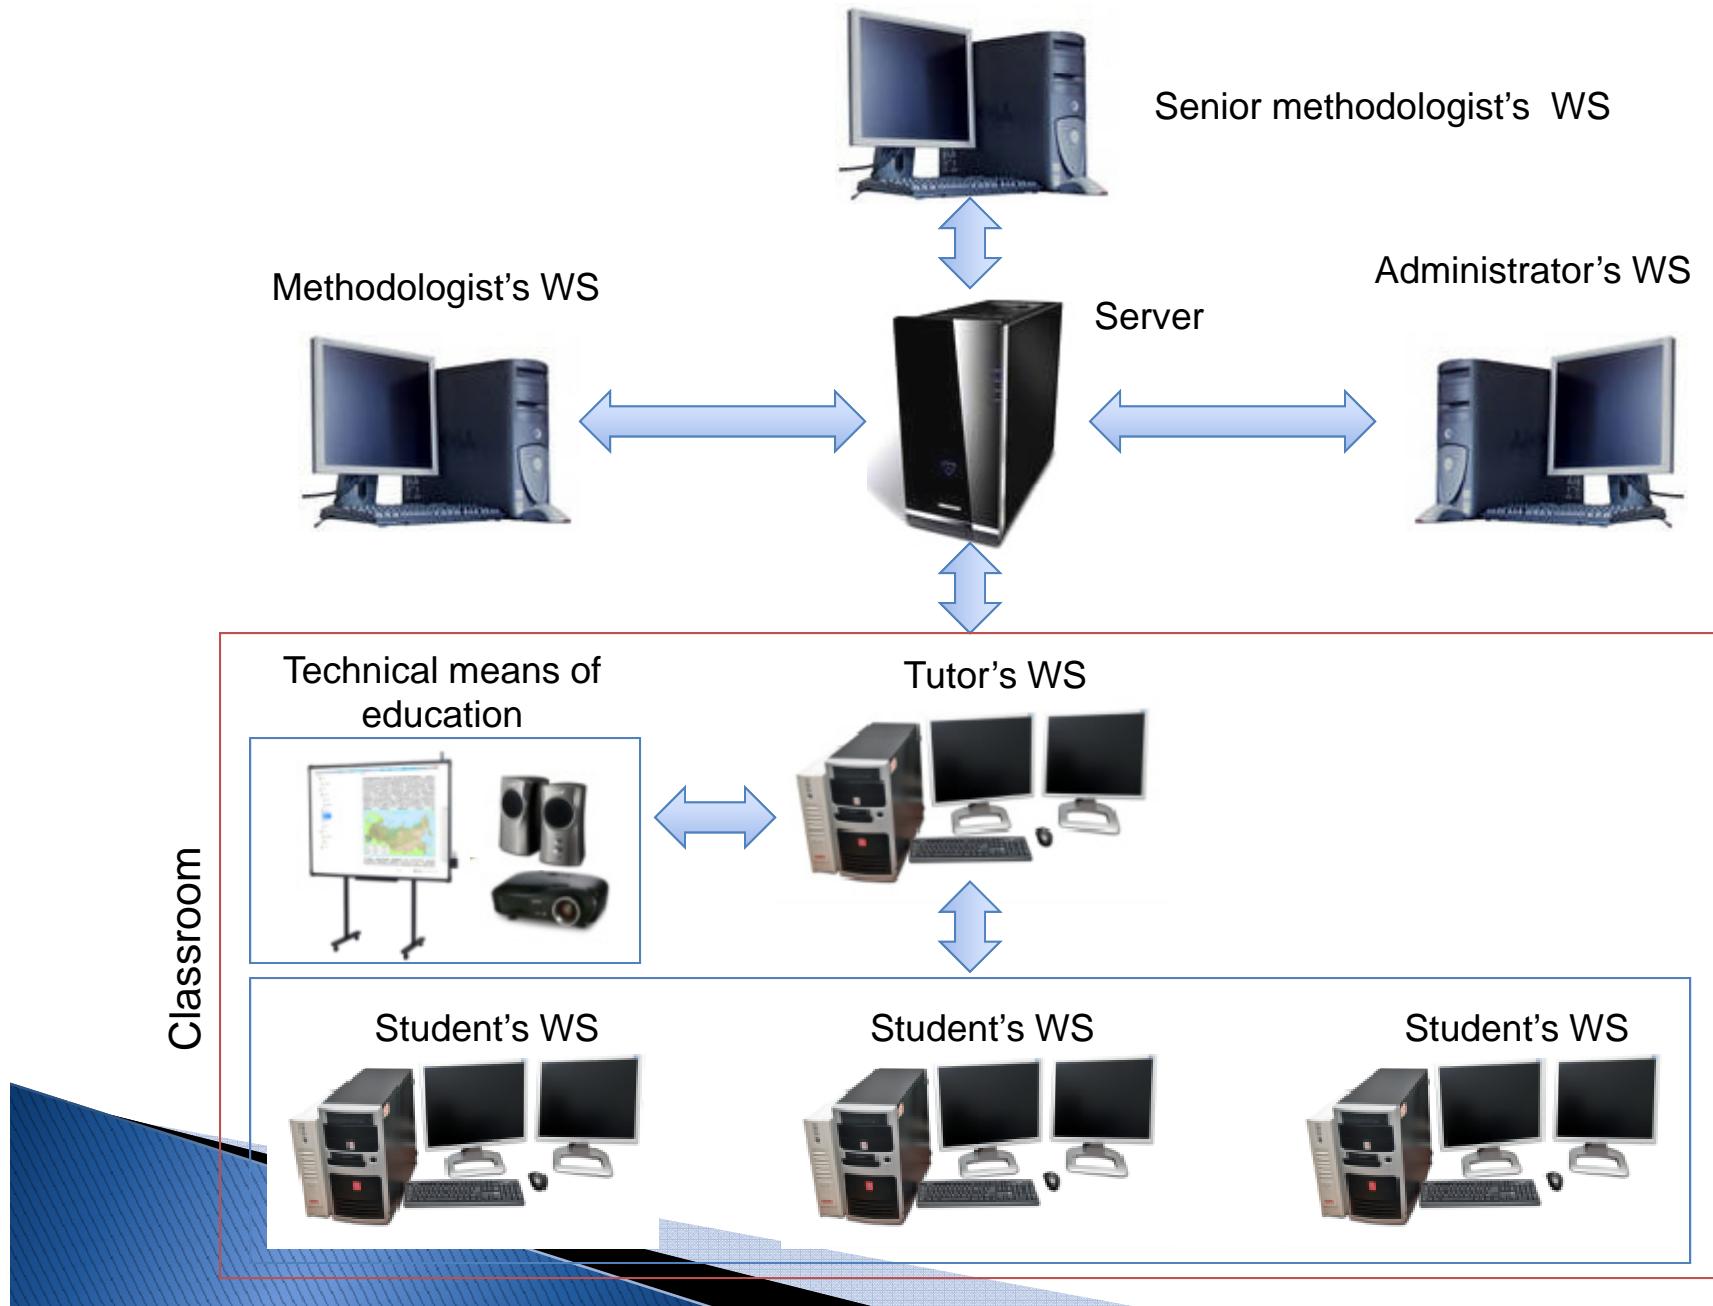

- preparation and storage of educational materials for all kinds of activities in accordance with the approved curriculum and thematic plan;
- study in accordance with the approved schedule;
- study of the laws regulating particular activities at checkpoints across the state border;
- studying of samples of border control technical means and of the other information technology means for border control;
- study and training of passport and visa documents forgery recognition;
- study and training of identification;
- study and training of working on the automated work places of system «Cascade»;
- study and training of border control schemes modeling;
- realization of current, intermediate and final education control.

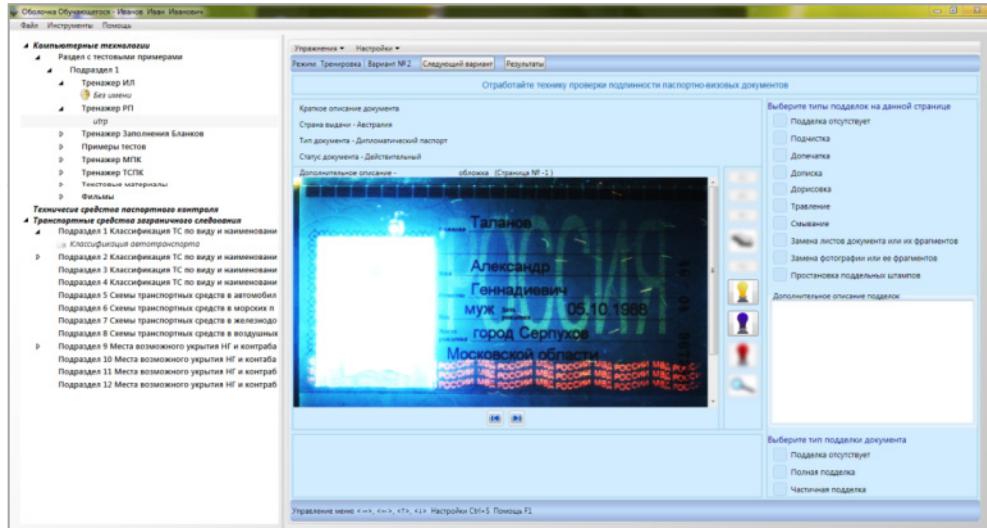

The main concept of Automated Education System (AES)

AES structure

Forgery recognition training simulator

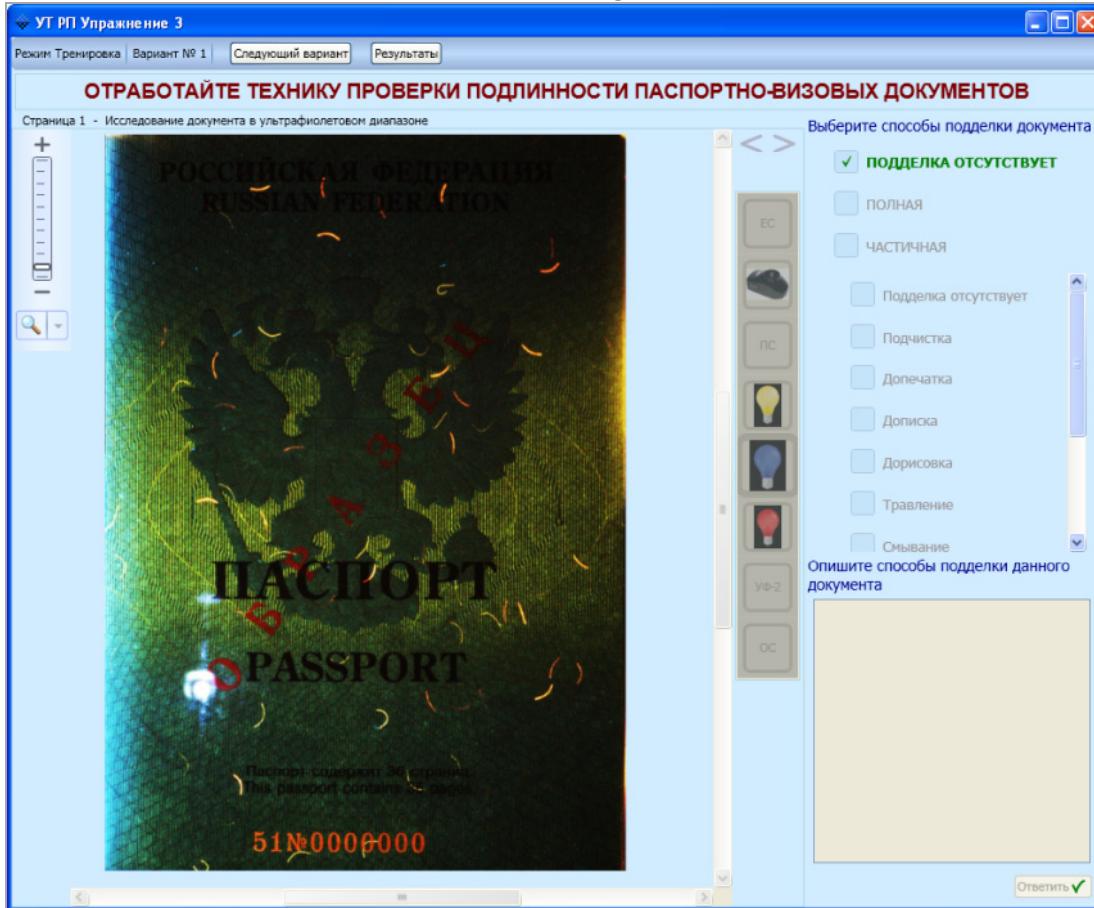

Passport security features
description

Passport research methods
description

Passport analysis

Using of forgery recognition training simulator

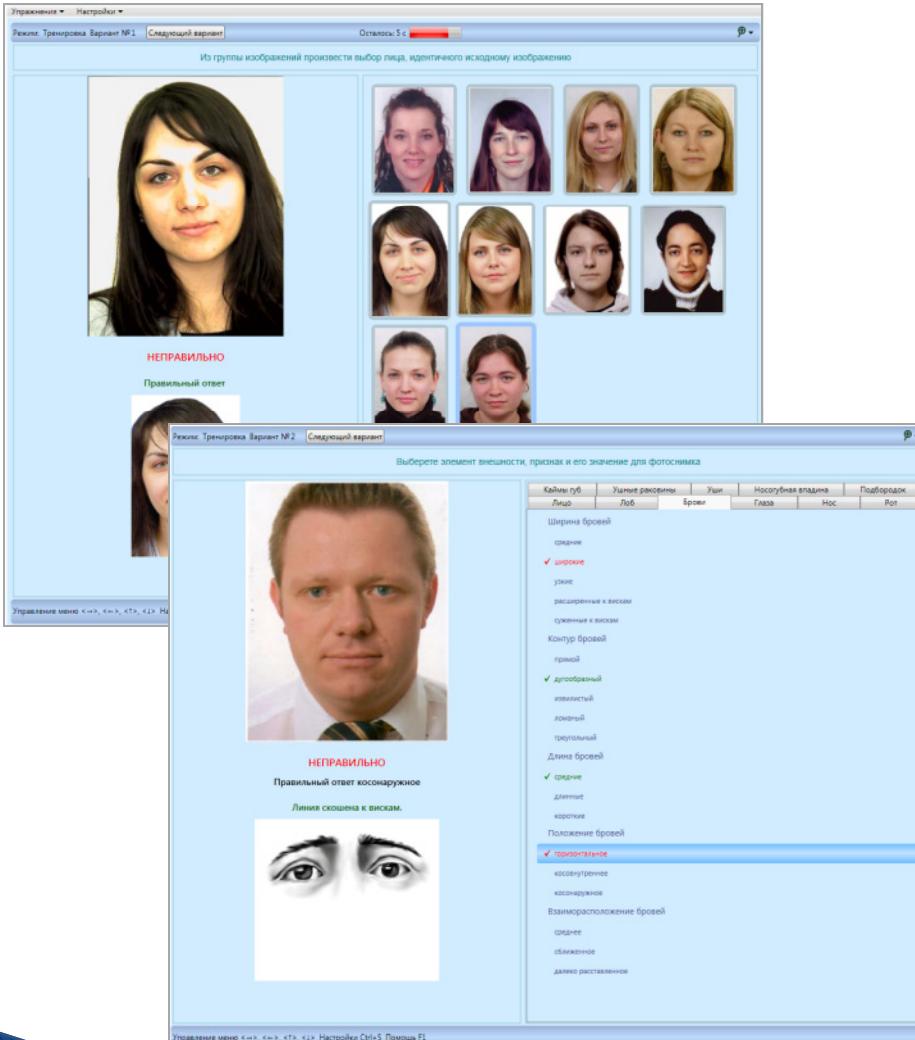

Training

Different means of passport check
(UV, IR, Visible, PC and other)

Identification training simulator

Facial features description

Facial features description by photo

Facial features description by photo in the case of short-time present

Comparison of images with a set of photos to identify the person

Comparison of video images with a set of photos to identify the person

Comparison of 3D images with a set of photos to identify the person

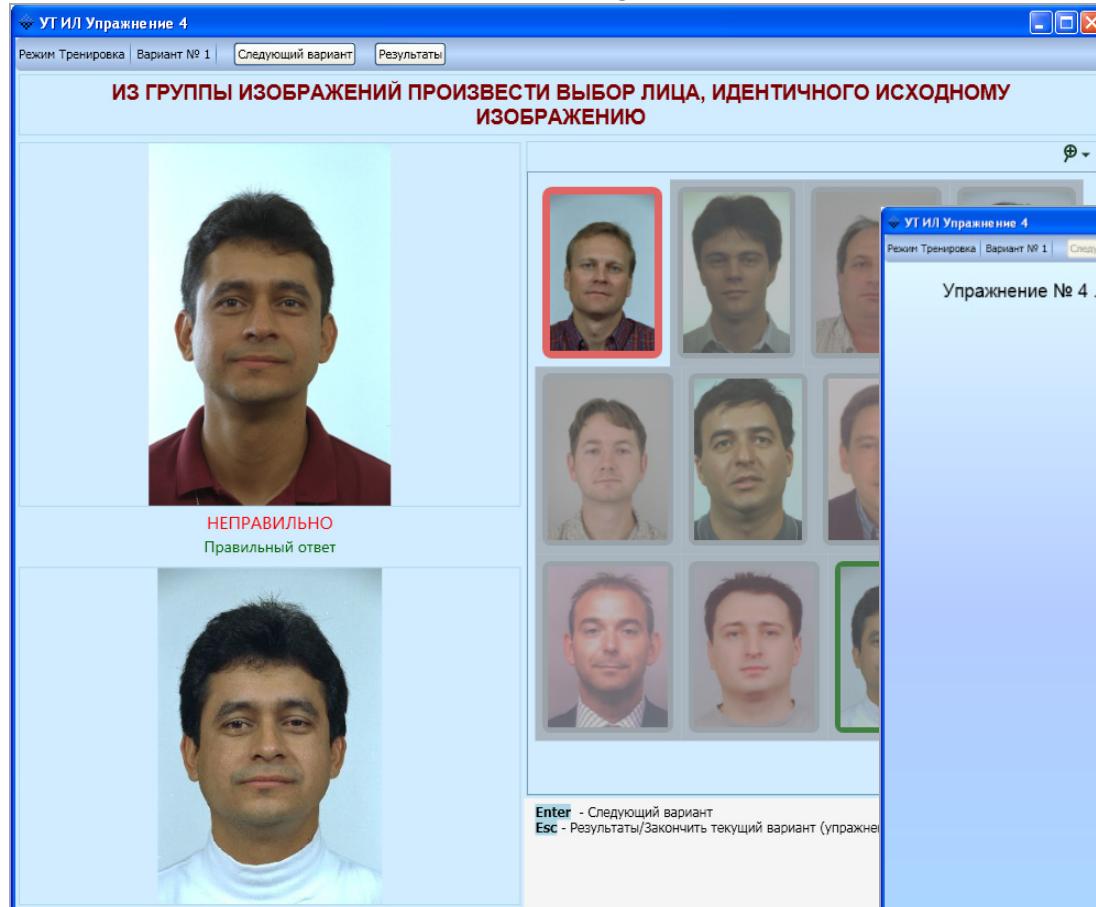

Making decision by mental image

Comparison of photos with one or more facial features

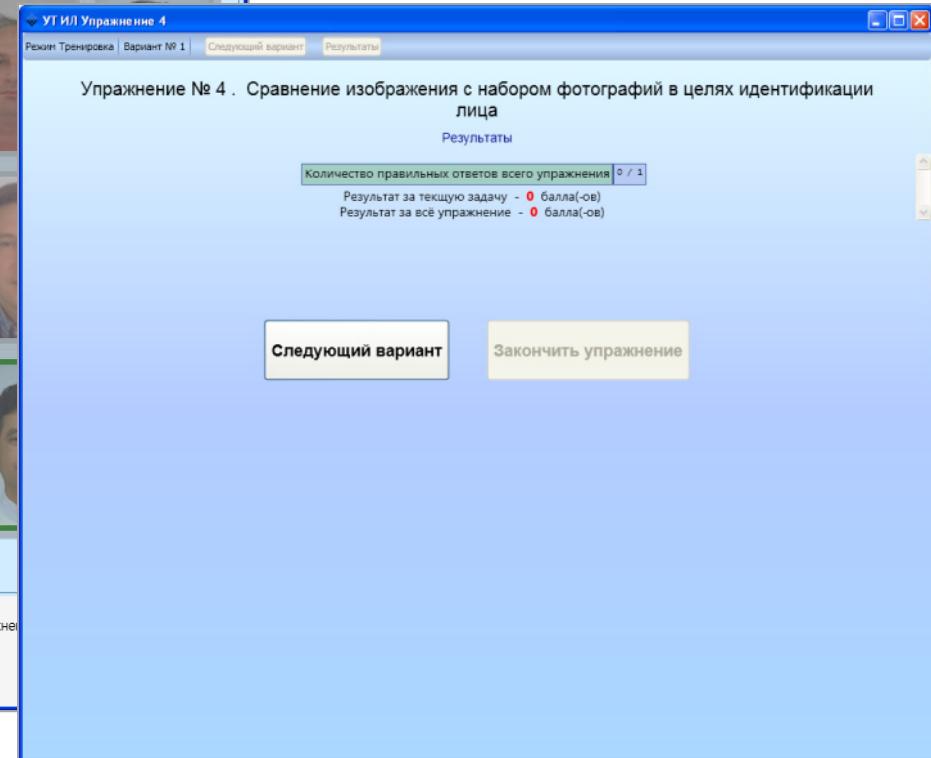

Integration with «Rubezh-Visit»

Using of identification training simulator

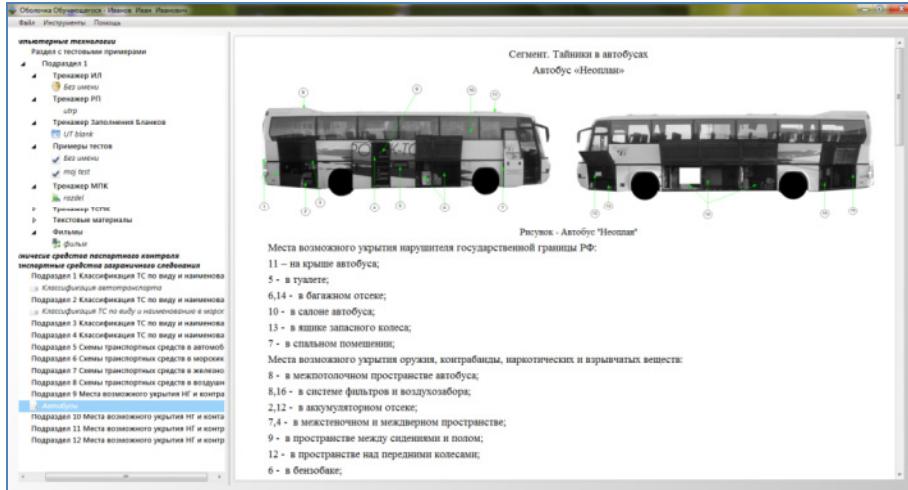

Training

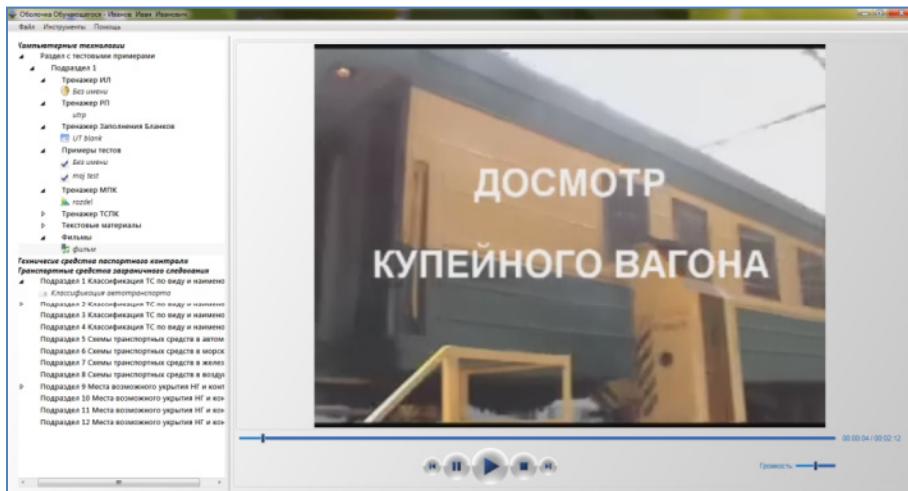

Results of training

Vehicles inspection training simulator

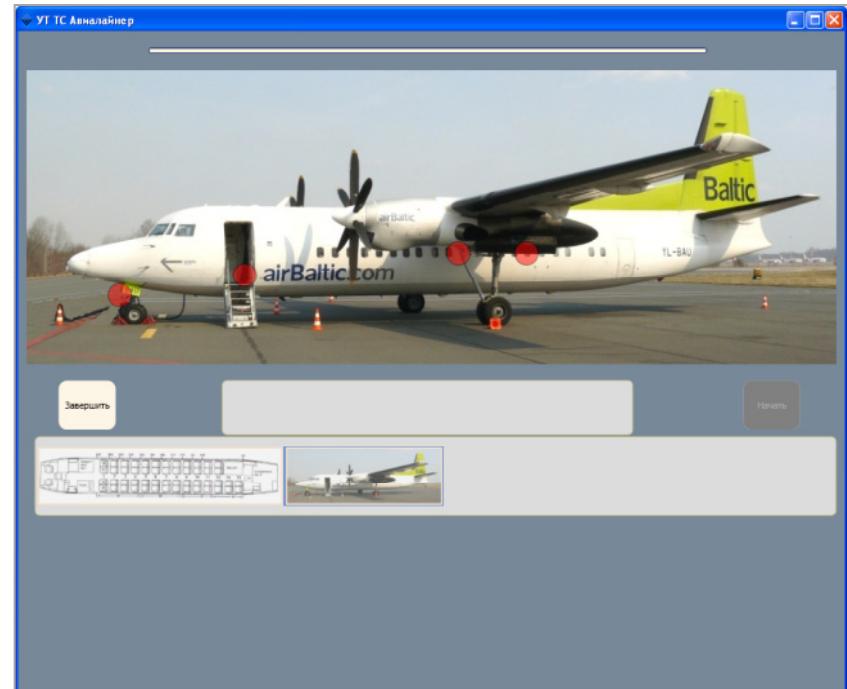

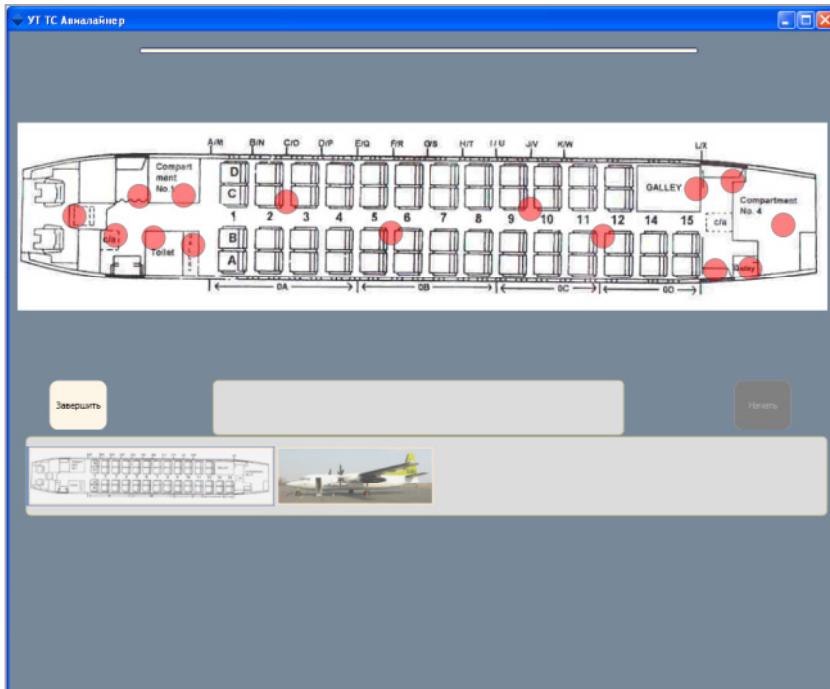

Study of vehicle inspection methods and procedures

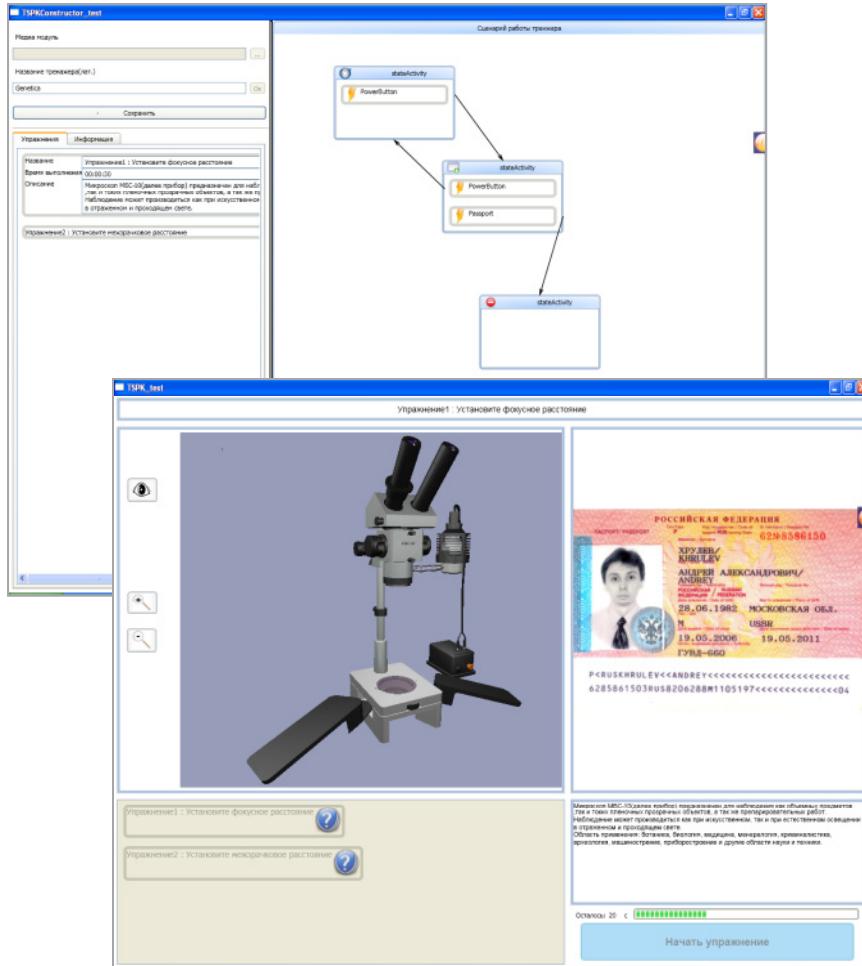

Monitoring of vehicle inspection procedures

Monitoring of vehicle inspection procedures

Monitoring of vehicle inspection procedures by different graphics

Training simulator of border control technical means

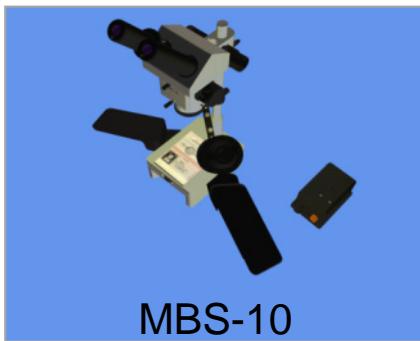

Study of work methods and characteristics of border control technical means

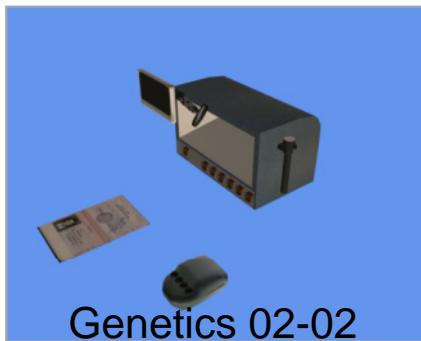

Study of working with border control technical means in the mode of virtual device

Study of the functional units and components of border control technical means

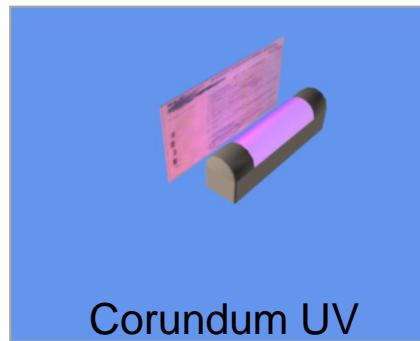

Interactive 3D-models

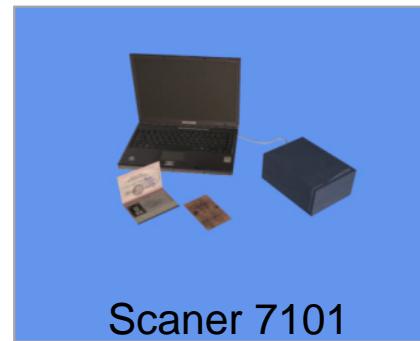

MBS-10

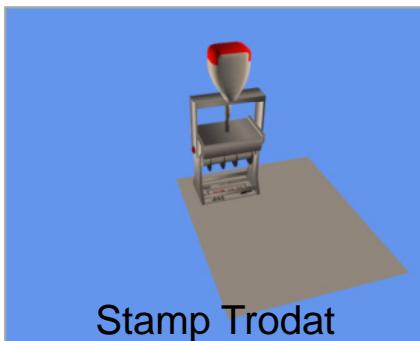

Genetics 02-02

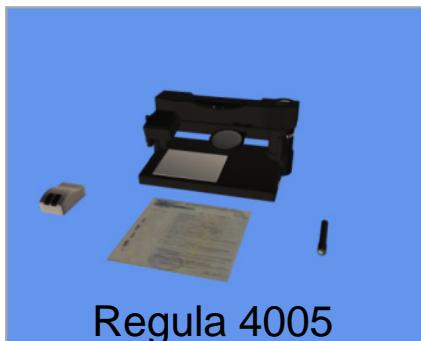

Corundum UV

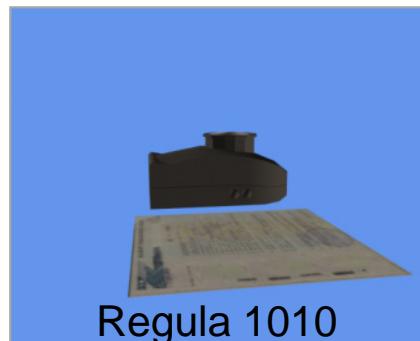

Scanner 7101

Stamp Trodat

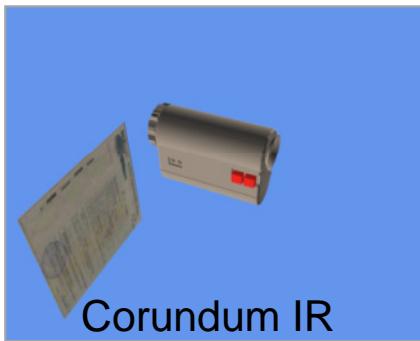

Regula 4005

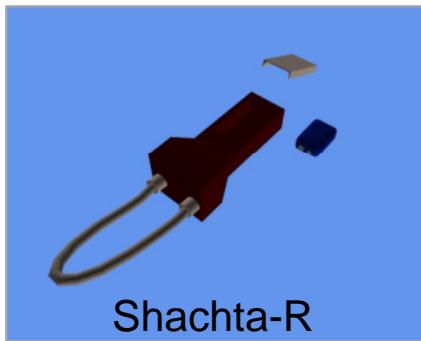

Regula 1010

Ultramag-C6-Y

Corundum IR

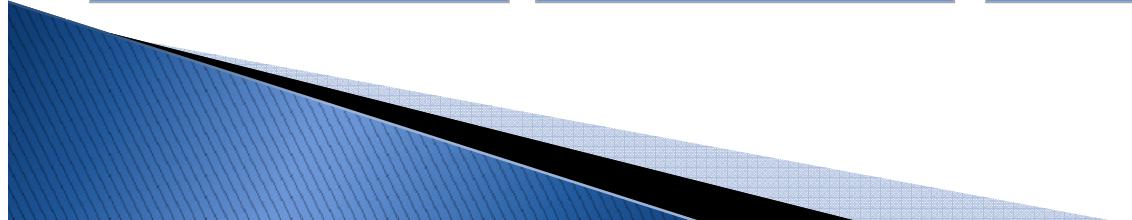

Shachta-R

Ultramag A36

New models
support

Using of training simulator of border control checkpoints schemes design

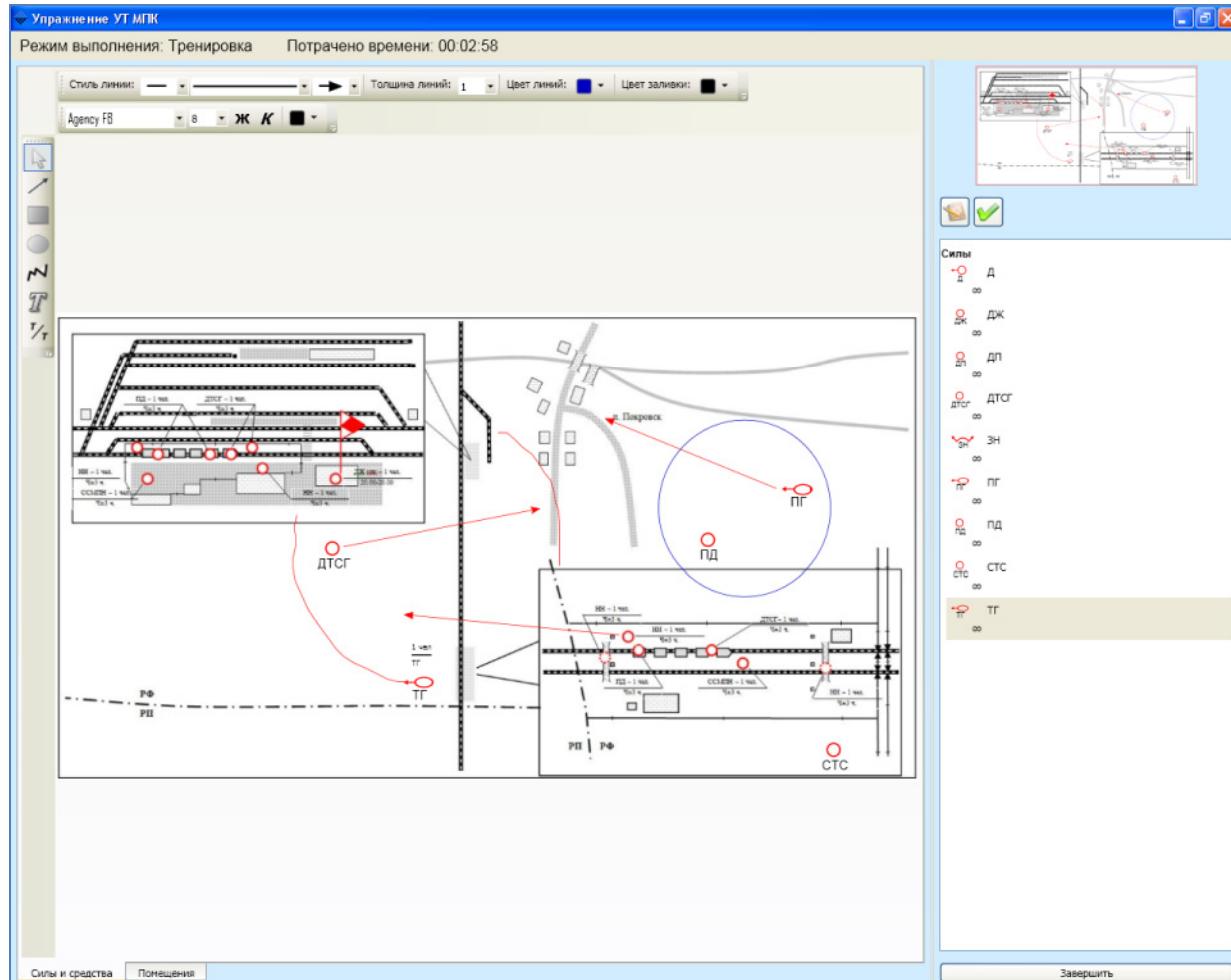

Схема с расставленными элементами

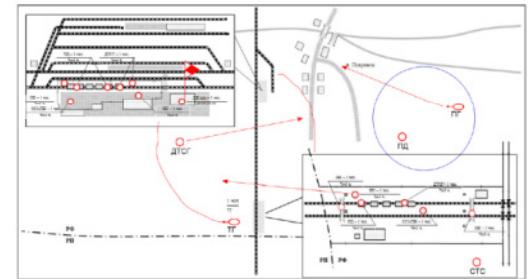

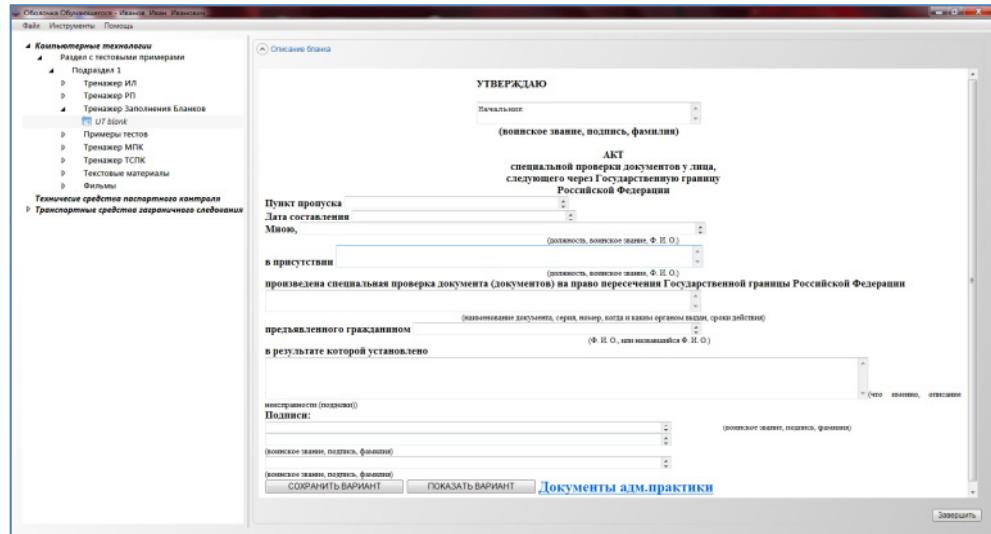

Таблица сил и средств

Название	Мин	Мин Опт	Макс Опт	Макс	Выбран
