

**INTERNATIONAL CIVIL AVIATION ORGANIZATION**

**Sixth Meeting of the APIRG Communications Sub-group**

**Nairobi, 24-26 September 2002**

---

---

**Agenda item 6: Radio Navigation Services**

(Presented by Tunisia)

**I. Introduction**

In order to upgrade air navigation aids and enhance approach and landing accuracy, Tunisia will install at the beginning of 2003 a new ILS Category II for runway 01/19 – threshold 01 at Tunis Carthage Airport.

Furthermore, there was in November 2001 in-flight check/control of navigation aids at Tunis airport (2 ILSs, 1 DME), at Tabarka Airport (1 ILS, 1 DVOR, 1 DME) and Monastir Airport (1 ILS, 1VOR , 1 DME).

This in-flight check/control revealed that the operation of this equipment was satisfactory.

On the other hand, consultation is underway for the selection of a company which will check periodically by the end of 2002 the remaining unchecked nav aids.

**II. Action by the Meeting**

The COM/SG/6 meeting is invited to take note of the information provided in this IP.
