

**INFORMAL AFI/EUR INTERFACE MEETING
SECOND MEETING
(Paris, 14 B16 February 2001)**

Agenda Item 1.3: Implementation of RNAV routes

1. Introduction

1.1 Under this Agenda Item, the meeting noted the status of implementation of RNAV routes in the Region . The meeting noted that Algeria has implemented most of the RNAV routes within its FIR and felt that there was a need for co-ordination with adjacent FIRs for the implementation of route segments within the airspace managed by ASECNA. The meeting agreed that this issue be addressed within the framework of informal co-ordination meetings between Algeria and ASECNA.

2. The meeting is invited to note that:

- a) RNAV route segments within the airspace managed by ASECNA be implemented as soon as possible in co-ordination with Algeria;**
- a) States ensure that proper co-ordination be made with adjacent FIRs for the simultaneous implementation of ATS routes/route segments;**
- c) the ICAO Regional Offices concerned assist in the co-ordinated implementation of ATS routes which pass through different FIRs**
