

# CORSIA AT A GLANCE SERIES

## PUBLICATION OF INFORMATION AND DATA FROM CORSIA CENTRAL REGISTRY

Information and data relating to CORSIA that are reported by States to ICAO through the CORSIA Central Registry (CCR) are published on the ICAO website in five **ICAO CORSIA documents** grouped as follows: **① Information and Data for Implementation (4 documents)** and **② Information and Data for Transparency (1 document)**.

### ① INFORMATION AND DATA FOR IMPLEMENTATION

The ICAO document **“CORSIA Central Registry (CCR): Information and Data for the Implementation of CORSIA”** is the umbrella document that provides information to support implementation of CORSIA. It includes the following ICAO documents:

- **“CORSIA Aeroplane Operator to State Attributions”** contains a list of Aeroplane Operators and the State to which they are attributed (used to avoid duplication or reporting gaps).

*Periodicity of updates: Annual*

- **“CORSIA 2020 Emissions”** provides total international aviation 2019 CO<sub>2</sub> emissions that can be used to determine the first year in which a new entrant has offsetting requirements.

*Periodicity of updates: As needed*

- **“CORSIA Annual Sector's Growth Factor (SGF)”**, which is calculated by ICAO and is used by States to calculate the offsetting requirements of the aeroplane operators attributed to them. The SGF is based on the total sectoral CO<sub>2</sub> emissions from international air routes between all participating States in a given year, and on the total sectoral CO<sub>2</sub> emissions during 2019 for the same routes and year (100% of 2019 emissions for 2021–2023 and 85% of 2019 emissions from 2024 onwards)

*Periodicity of updates: Annual*

## 2 INFORMATION AND DATA FOR TRANSPARENCY

The ICAO document "**CORSIA Central Registry (CCR): Information and Data for Transparency**" provides information to ensure transparency of CORSIA.

***Periodicity of updates:** Annual updates for verification bodies, CO<sub>2</sub> emissions, and CORSIA eligible fuels; Triennial updates for cancelled eligible emissions units*

The document includes information and data on:

- **List of verification bodies accredited in States**
- **Total 2019 CO<sub>2</sub> emissions aggregated for all aeroplane operators on each State pair**
- **Total annual CO<sub>2</sub> emissions for 2021 onwards:**
  - Total annual CO<sub>2</sub> emissions aggregated for all aeroplane operators on each State pair (with identification of State pairs subject to offsetting requirements)
  - For each aeroplane operator:
    - Name
    - State to which it is attributed
    - Reporting year
    - Total annual CO<sub>2</sub> emissions
    - Total annual CO<sub>2</sub> emissions for State pairs subject to offsetting requirements
    - Total annual CO<sub>2</sub> emissions for State pairs not subject to offsetting requirements
- **CORSIA eligible fuels claimed:**
  - Production year
  - Name of producer
  - Type of fuel, feedstock and conversion process used
  - Batch number(s)
  - Total mass
  - Reporting State
- **Offsetting requirements and emissions units cancelled (at State and global aggregate level for a specific compliance period):**
  - Total final offsetting requirements
  - Total quantity of emissions units cancelled
  - Consolidated identifying information for cancelled emissions units:
    - Quantity of emissions units cancelled
    - Start and end of serial numbers, and date of cancellation
    - Eligible emissions unit programme
    - Unit type, Host country, Methodology
    - Demonstration of unit date eligibility
    - Programme-designated registry name
