Dear ICAO Office of the Environment,

Per our letter dated March 16, 2020 confirming ACR's acceptance of the terms of eligibility for supplying CORSIA Eligible Emissions Units, we herein formally notify you of ACR's proposed program updates to materially expand the scope of eligibility for post-2020 ACR units.

The attached Appendix C to the ACR Standard, *ACR Requirements for Avoiding Double Counting in the CORSIA*, is provided on a Business Confidential basis.

We would be happy to discuss the requirements with the TAB, including timing for publication, and answer any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Mary Grady".

Mary Grady
