

Table of Contents

Insights from the President of the ICAO Council.....	2
Insights from the Secretary General of ICAO	4
Insights from the Director of the Air Transport Bureau (DATB), ICAO.....	7
A Historic Milestone in Aviation Environmental Progress	10

CHAPTER ONE: AVIATION & ENVIRONMENTAL OUTLOOK

Turning Ambition into Action: From the LTAG and Global Framework to International Cooperation	19
Overview of the Thirteenth Cycle of the Committee on Aviation Environmental Protection (CAEP/13)	23
Environmental Trends in Aviation to 2070	28
The State of Global Climate and Hazards posed by Sand and Dust Storms and Wildfires	36
Bridging the Upper-Air Data Gap	40
In-Service Aircraft for a Global Observing System	42
ICAO's work on NO _x emissions regulation.....	45
Global cooperation to advance the understanding of Non-CO ₂ effects in aviation	49
Encouraging diversity in the aviation sector.....	53
Advancing Sustainable Aviation: developments in aviation sustainability from the academic perspective	57

CHAPTER TWO: CLIMATE CHANGE MITIGATION — OVERVIEW

Advancing Global Aviation Climate Mitigation: Setting the Scene for LTAG Implementation	65
Introduction to the LTAG Monitoring and Reporting (LMR) Methodology	68
Path to net zero: Turning ambition into action	72
Exploring the Contribution of Short-Lived Climate Pollutants (SLCPs) Mitigation to ICAO's Long-Term Aspirational Goal	75
To Achieve LTAG: Ways to Address and Minimize Residual CO ₂ Emissions	79
Message from Airbus' Chief Sustainability Officer (CSO)	82
Empowering Policy and Progress: How Boeing's Cascade Tool Maps Paths to Aviation's Future	84
How to Integrate non-CO ₂ Effects in Monitoring, Reporting and Verification Mechanisms – an Insight into Technical Options	86
Institute for Sustainable Aviation: Three Years of Interdisciplinary Research and Training Excellence	90

CHAPTER THREE: CLIMATE CHANGE MITIGATION — AIRCRAFT TECHNOLOGIES

Technology Solutions to Support ICAO's Long-Term Global Aspirational Goal (LTAG)	95
Emissions Technical: Progress of CAEP/13 Working Group 3	98
Enabling a zero-carbon future for aviation	101
Taking Flight Towards Greater Sustainability with CFM International's RISE Initiative	106
How hybrid-electric technology can facilitate better adoption of sustainable aviation fuel	109
Beyond Aero: A Startup Revolutionizing Aviation Towards a Hydrogen-Electric Future	112
Addressing Non-CO ₂ Emissions — the way towards clean and competitive aviation.....	117

CHAPTER FOUR: CLIMATE CHANGE MITIGATION — OPERATIONS

Overview of operational improvements and ICAO's path to net-zero carbon emissions by 2050	122
ICAO's Progress on Sustainable Airports and Flight Operations – CAEP Working Group 2 Report.....	125
Vertical Flight Efficiency En-Route (VFE-ER)	131
The role of the pilot in climate change mitigation through operations	137
Operational Opportunities to Reduce Climate Effects of Contrails.....	141
Operational opportunities and challenges for addressing air transport's non-CO ₂ environmental impacts.....	145
Leveraging environment footprint reduction in operations, including non-CO ₂	150

CHAPTER FIVE: CLIMATE CHANGE MITIGATION — AVIATION CLEANER ENERGIES

ICAO Global Framework for SAF, LCAF and other aviation cleaner energies.....	155
Policy and Planning, and Regulatory Framework Foundations for Aviation Cleaner Energies.....	159
Advancing CORSIA-Eligible Fuels (CEFs)	163
Emerging Technologies and processes for an increased SAF production.....	165
The Increasing Importance and Potential of Electricity for CORSIA Eligible Fuel Production.....	168
Japan's Efforts to Introduce SAF	172
Fueling the future: Brazil's strategy on SAF and aviation energy transition.....	176
A quiver of policy tools needed to hit sustainable aviation fuel targets	180
Global Landscape of SAF Accounting Methodology and Registry Systems.....	185
Bridging the Sustainable Aviation Fuel (SAF) Premium	191
Impact of Hydrogen in Aviation	194
Aviation Impact Accelerator (AIA)	198

CHAPTER SIX: CARBON OFFSETTING AND REDUCTION SCHEME FOR INTERNATIONAL AVIATION (CORSIA)

Introduction to CORSIA.....	205
Overview of the CAEP/13 updates concerning CORSIA.....	209
The Role of ICAO's CORSIA Central Registry (CCR) in CORSIA Implementation.....	213
CORSIA Implementation in the Dominican Republic.....	219
CORSIA Emissions Units: Key updates, the role of the Technical Advisory Body and Future Direction	221
Article 6 of the Paris Agreement: Supporting International Climate Cooperation and CORSIA	225
A call to action: Ensuring CORSIA's robust implementation	227
CORSIA Eligible Fuels Certification: Processes and Progress.....	231
Certification of CORSIA eligible fuels.....	235
Bringing CORSIA to a new level while shaping global carbon markets and fostering international cooperation	237
The 2025 CORSIA periodic review.....	241
A Recap of ICAO's Journey towards 2016 CORSIA Agreement.....	245

CHAPTER SEVEN: STATE ACTION PLANS

Advancing Sustainable Aviation: The ICAO State Action Plan initiative.....	249
Chile's Actions to Enable Sustainable Aviation.....	253
Oman Vision 2040: A National Blueprint for Sustainable environment and Clean Energy.....	257
Operational Benefits of the Implementation of Free Route Airspace in Kano Flight Information Region (Nigeria).....	260
Assessing the Clarity of Net-Zero State Action Plans.....	264

CHAPTER EIGHT: CAPACITY BUILDING AND IMPLEMENTATION SUPPORT

ACT-SAF and ACT-CORSIA Programmes overview & recent developments	268
Regional Perspectives on Progress from ICAO Regional Officers towards the Long-Term Global Aspirational Goal (LTAG).....	273
Greening Aviation through Global Aviation Partnerships – the contribution of the European Union	289
Kenya's Role in the Global Effort on Aviation Environmental Protection and Sustainable Aviation Fuels (SAF) development, Strengthened by International Support and Collaboration	293
Lessons Learned from Capacity Building Sessions in the Caribbean.....	299
Participation of the Dominican Republic in the EASA Assistance Projects with the European Union Funding....	302
Ramping up roadmaps under ICAO's ACT-SAF initiative: experience from Boeing and partners	306

CHAPTER NINE: CLIMATE FINANCING

Mobilizing Financing for a Net-Zero Aviation Sector.....	311
The ICAO Finvest Hub.....	313
Partnering for Aviation Decarbonisation: The ICAO-IRENA Approach.....	315
Combining and sequencing public-private levers can increase the likelihood of SAF project financing.....	317
Innovative financing structure for large scale SAF Projects.....	320
The RLCF Alliance: enabling SAF development in the EU and beyond.....	324
From Innovation to Impact: Building Tomorrow's Aerospace Sector.....	327

CHAPTER TEN: AIRCRAFT NOISE

Advancing Global Standards for Aircraft Noise: Developments from CAEP/13 and Outlook to CAEP/14.....	331
Towards future noise standards for Emerging Technology Aircraft (ETA).....	334
Noise Monitoring Systems Good Practices.....	337
Revisiting Noise Abatement Departure Procedures (NADP) Application.....	341
Aircraft Noise: A Balanced Path Toward Community and Operational Sustainability.....	345

CHAPTER ELEVEN: LOCAL AIR QUALITY

Addressing Local Air Quality: Latest Progress by ICAO.....	350
ICAO Airport Air Quality Manual Update (Doc 9889).....	352
Local Air Quality and Sustainable Aviation Fuels (SAF).....	356
Standards and Advances in Airport Air Quality Modelling.....	360
Jointly regulating jet fuel aromatic and sulfur content: A near-term strategy for public health and climate benefits.....	364

CHAPTER TWELVE: GREEN AIRPORTS

Green Airports: At the Frontier of Aviation's Cleaner Energy Transition.....	374
Advancements in the Eco-Airport Toolkit e-Collection.....	378
Holistic Airport Decarbonisation from Ground to Air.....	382
Green Airports based on the good practices implemented in Dominican Republic international airports.....	386
Advancing Decarbonization through Energy Efficiency at İGA İstanbul Airport.....	389

CHAPTER THIRTEEN: CLIMATE ADAPTATION & RESILIENCE

Taking Flight Towards Climate Resilience.....	394
Climate Adaptation Synthesis Update	398
United Nations' WMO initiatives	402
Climate Change Adaptation Action in Europe.....	404
Understanding Airport Resilience & Adaptation: Insights from Airport Managers.....	406
Preparing airports for a changing climate.....	412
The role of co-design in assessing climate risk: case of Bologna Airport	415

CHAPTER FOURTEEN: TOWARDS A CIRCULAR ECONOMY

Advancing Circular Economy Practices in Aviation	420
Transitioning towards a circular economy.....	424
Pioneering Circularity in Airport Operations: Schiphol's Path to Zero-Waste.....	427
Sustainable Plastic Management	431

CHAPTER FIFTEEN: BIODIVERSITY

Biodiversity and Nature-Based Solutions: an emerging topic for the aviation sector	436
Making peace with nature is a flight humankind cannot miss.....	441
Integrating Biodiversity and Nature-Based Solutions in Airport Operations.....	444
Enhancing biodiversity by carbon sequestration through Nature-Based Solutions — Abidjan Airport Côte d'Ivoire	447
Harmonising Aviation Growth and Marine Biodiversity: HKIA's Innovative Approach	451

CHAPTER SIXTEEN: MULTISTAKEHOLDER COOPERATION

Advancements in Multistakeholder Cooperation Over the Last Triennium	457
Working Together for Net-Zero by 2050: UNFCCC and ICAO's Joint Efforts.....	462
ICAO Carbon Emissions Calculator (ICEC): a reference tool for estimating carbon emissions.....	465
The Role of Aviation in the UN Decade of Sustainable Transport 2026–2035	468
Partnering to Bolster Impact: the Sustainable Mobility for All (SuM4All) initiative experience	469
Message from the Secretary-General of the International Transport Forum (ITF)	472
Message from the Executive Secretary of the Convention on Biological Diversity (CBD).....	474
