

Aviation actions and initiatives on climate change

SIDE EVENT

23rd August 2008: 18:00 – 20:00

How much is aviation growing and how will this growth affect our global climate?

What can be expected from technology in the short term and the longer term?

What action is the industry taking to reduce aviation emissions?

How can aviation emissions be reduced when more and more people are travelling by air?

All participants to the ACCRA Climate Change talks are invited to a stimulating side event where top air transport experts will engage in an enlightening and comprehensive analysis of international aviation and climate change

- | | |
