TESTING AND CROSS-BORDER RISK MANAGEMENT MEASURES MANUAL (DOC 10152)

1. The International Civil Aviation Organization (ICAO) has released new guidance material, *Testing and Cross-Border Risk Management Measures Manual* (Doc 10152), developed by the Collaborative Arrangement for the Prevention and Management of Public Health Events in Civil Aviation (CAPSCA).
2. This new manual supplements the recommendations contained in the CART High-Level Cover Document and guidelines outlined in the Second Edition of the *Take-off: Guidance for Air Travel through the COVID-19 Public Health Crisis*.
3. It provides guidance on a risk and evidence based approach when implementing a multi-layer risk management strategy. Updated guidance is included in Doc 10152 for COVID-19 testing and its interdependencies with other risk mitigation measures for those States that choose to include testing as an element of their risk management strategy.
4. While recognizing the sovereignty and authority of States, and considering their national frameworks and public health capacities, States are recommended to use the processes outlined in the Manual as the basis for its assessment.
5. *Testing and Cross-Border Risk Management Measures Manual* (Doc 10152) is made available on the ICAO-NET and the ICAO CART website (<https://www.icao.int/covid/cart/Pages/default.aspx>).
6. This guidance forms part of the ICAO Implementation Package on establishing a Public Health Corridor which is available to States (<https://www.icao.int/secretariat/TechnicalCooperation/Pages/establishing-a-public-health-corridor.aspx>).
7. States are encouraged to consider this guidance in coordination with ICAO Regional Offices according to their specific needs and circumstances.

Issued under the authority of the Secretary General
