

**РАБОЧИЙ ДОКУМЕНТ****ГРУППА ЭКСПЕРТОВ ПО ОПАСНЫМ ГРУЗАМ (DGP)****ДВАДЦАТЬ ТРЕТЬЕ СОВЕЩАНИЕ****Монреаль, 11–21 октября 2011 года**

Пункт 2 повестки дня. Разработка рекомендаций относительно поправок к *Техническим инструкциям по безопасной перевозке опасных грузов по воздуху* (Doc 9284) в целях их внесения в издание 2013–2014 гг.

ТАБЛИЦА 3-1. ПЕРЕЧЕНЬ ОПАСНЫХ ГРУЗОВ

(Представлено Т.Л. Мюллером)

АННОТАЦИЯ

(В связи с ограниченными ресурсами переведены только аннотация и добавление.)

В настоящем рабочем документе предлагается ввести изменения в перечень опасных грузов, относящиеся к различным перекрестным ссылкам и наименованиям, указанным как "запрещенные", а также включить во все перекрестные ссылки перечня опасных грузов номера ООН.

Действия DGP: DGP предлагается:

а) изменить перекрестную ссылку или названия, относящиеся к другим наименованиям, указанные в таблице, приведенной в добавлении А к настоящему рабочему документу, как предложено в последней колонке данной таблицы. Применительно к наименованиям под номерами 45 и 46 данной таблицы слово "стабилизированный" в измененном наименовании помещается в квадратные скобки, поскольку в перекрестных наименованиях Типовых правил ООН используется слово "ингибированный";

б) изменить наименование "Перекись (перекиси) метил этил кетона" и ввести наименования "трет-Амилперокси-3,5,5- trimetilgексаноат" и "Перекись диянтарной кислоты", как указано в добавлении В к настоящему рабочему документу;

с) включить соответствующий(е) номер(а) ООН в перекрестные ссылки, которые в настоящее время указываются без номера(ов) ООН.

В настоящем рабочем документе не содержится вся подробная информация о том, к каким перекрестным ссылкам следует добавить номера ООН. Тем не менее в разделе "Индекс" Типовых правил ООН содержится подробная информация для большинства перекрестных ссылок.

1. INTRODUCTION

1.1 The Dangerous Goods List (Table 3-1) in the Technical Instructions contains various so-called cross-references for synonyms or other names. The synonyms are followed by the word "see" and the proper shipping name in boldface characters, e.g. Acetoin, sees **Acetyl methyl carbinol**. The presenter of this working paper noted that some cross references are not in line with the UN Model Regulations, for example, cross references are made to Charges, shaped commercial while this proper shipping name for this entry has been changed many years ago to Charges, shaped.

1.2 Some of the cross-referred proper shipping names are followed by the appropriate UN number(s), e.g. Accumulators, electric, see **Batteries, etc.** (UN Nos. 2794, 2795, 2800, 3028, 3292). However, this is not the case with all cross-references, e.g. some synonyms for Ammunitions are shown with the appropriate UN numbers and some are not. Showing the UN numbers with the cross reference is more user friendly and makes it clear which possible entries for a certain synonym or other name exist in the Dangerous Goods List.

1.3 The Dangerous Goods List also contains dangerous goods that meet the description of dangerous goods forbidden on aircraft under any circumstances. These entries are listed with the word Forbidden across columns 2 and 3 of the list. Appendix B of this working paper contains an error in one of the listed Forbidden organic peroxides and a few forbidden organic peroxides that are not listed.
