

DANGEROUS GOODS PANEL (DGP)

TWENTIETH MEETING

Montréal, 24 October to 4 November 2005

Agenda Item 2: Development of recommendations for amendments to the Technical Instructions for the Safe Transport of Dangerous Goods by Air (Doc 9284) for incorporation in the 2007-2008 Edition

RECEPTACLES, SMALL, CONTAINING GAS (UN SPECIAL PROVISION 191)

(Presented by K. Vermeersch)

1. INTRODUCTION

1.1 UN special provision 190 is, although slightly amended, incorporated in the Technical Instructions as special provision A98:

“Aerosols with a capacity not exceeding 50 ml, containing no constituents subject to these instructions other than a Division 2.2 gas, are not subject to these Instructions unless their release could cause extreme annoyance or discomfort to crew members so as to prevent the correct performance of assigned duties.”

1.2 During the review of Working Paper 6 it was noted that the equivalent special provision (UN special provision 191) for “UN 2037 **Receptacles, small, containing gas** (non-flammable) without a release device non-refillable” is missing in the Technical Instructions.

2. PROPOSAL

2.1 Add a new special provision in Table 3-2

Axx: Receptacles, small, containing gas are not fitted with a release device. Receptacles with a capacity not exceeding 50 ml, containing no constituents subject to these instructions other than a Division 2.2 gas, are not subject to these Instructions unless their release could cause extreme annoyance or discomfort to crew members so as to prevent the correct performance of assigned duties.

2.2 Add Axx in Table 3-1 in column 7 for “UN 2037 **Receptacles, small, containing gas** (non-flammable) without a release device non-refillable”

— END —
