

DANGEROUS GOODS PANEL

Dubai, 31 March to 4 April 2003

Agenda Item 2: Development of recommendations for amendments to the Technical Instructions for incorporation in the 2005/2006 edition

**FLAMMABLE SOLIDS AND ORGANIC PEROXIDES WITH EXPLOSIVE
SUBSIDIARY RISK**

(Presented by G. A. Leach)

1. INTRODUCTION

1.1 In the 1999-2000 edition of the Technical Instructions, Part 1; 2.1 g) stated that flammable solids and organic peroxides with a subsidiary risk of explosive were forbidden for transport by air under any circumstance. However, this prohibition was removed when 1; 2.1 was re-written for the 2001-2002 edition (to align with 1.1.3 in the UN Model Regulations). Consequently, self-reactive substances classified as UN3232 and UN3222; and organic peroxides classified as UN3101, UN3102, UN3111 and UN3112 are now permitted for carriage under exemption and it is queried whether this was the intention of the Panel.
