

**WORKING PAPER**

**DANGEROUS GOODS PANEL (DGP)  
MEETING OF THE WORKING GROUP OF THE WHOLE**

**Beijing, China, 25 October to 3 November 2006**

**Agenda Item 3: Development of recommendations for amendments to the *Supplement to the Technical Instructions for the Safe Transport of Dangerous Goods by Air* (Doc 9284) for incorporation in the 2009/2010 Edition**

**IDENTIFICATION OF TOXIC BY INHALATION MATERIALS IN THE SUPPLEMENT**

(Presented by R. Richard)

**SUMMARY**

This working paper proposes that toxic by inhalation materials be identified in the Supplement to assist States in prescribing appropriate requirements when such substances are transported under approval by the appropriate national authority.

Action by the DGP-WG is in paragraph 2.

**1. INTRODUCTION**

1.1 Currently substances which are toxic by inhalation are forbidden from transport on both passenger and cargo aircraft. However a number of these substances are assigned Special Provision A2 which allows their transport with the approval of the appropriate national authority. It is noted that in such cases neither Table 3-1 nor Special Provision A2 provides any indication that such substances are toxic by inhalation. Such information is considered to be of importance when assigning appropriate packaging and quantity authorizations when substances are transported by approval in accordance with Special Provision A2.

1.2 A list of substances known to be toxic by inhalation is attached (see Appendix A).

**2. ACTION BY THE DGP-WG**

2.1 The DGP-WG is invited to agree to the identification of Toxic by Inhalation Substances in the Supplement by assigning a Special Provision to the applicable entries:

**2XX This substance meets the criteria of a material toxic by inhalation**
