

Katsuyuki Nakatsubo

Executive Director, Electronic Navigation Research Institute (ENRI), Japan

After joining the Civil Aviation Bureau(JCAB), Ministry of Transport(MOT) in 1978, He was assigned at various technical positions in the administration as well as in the research institute (ENRI) which serves as national institute for air navigation.

During the service, he had been extensively involved in the ICAO standardization process including the service as an Air Navigation Commissioner and at ICAO secretariat as well as at various technical panels such as AMCP, SICASP and VAP.

In recent years, He has been involved in the implementation, later research and development of various systems including Satellite based Augmentation System (SBAS), Aeronautical Mobile Satellite Service (AMSS), SSR Mode S, Multilateration Surveillance System for airport surface as well as visual aids including stop bars.
