

ICAO GRSS Montreal May 2011

Biographical Information

Captain Bertrand de Courville - Air France

bedecourville@airfrance.fr

Bertrand de Courville is currently captain on Airbus A340 and A330. He joined in 2009 the Air France Corporate safety department in charge of the implementation and coordination of the new ICAO standards of Safety Management System.

He is member of the IATA Safety Group and co-chair of ECAST, European Commercial Aviation Safety Team a European Industry/Authority partnership dedicated to safety.

He was previously head of the Flight Safety Department responsible for managing the airline flight safety reporting program and recorded flight data monitoring program.

Bertrand de Courville has more than 25 years experience as an airline pilot with Air France where he held different management positions, all directly or indirectly related to safety management. He managed the implementation of the first Air France Crew Resource Management training program in 1994.

Bertrand de Courville is also qualified on many type of aircraft from gliders to float planes.
