

William R. Voss
President and CEO Flight Safety Foundation

William Voss is the President and CEO of the Flight Safety Foundation – which is an independent international, non-political organization created in 1947 to improve aviation safety worldwide.

Previously, Mr. Voss was the Director of the Air Navigation Bureau in the International Civil Aviation Organization (ICAO). In this position, he was responsible for international regulatory standards for aircraft, pilots, airlines, air traffic control, and airports. He led efforts to establish plans for the improvement of efficiency and safety of the global air transport system, and he played a major role in the drive towards increased transparency and accountability in international aviation.

Prior to this Mr. Voss had a long career with the US Federal Aviation Administration where he began his service as an air traffic controller and eventually assumed executive positions directing the modernization of the US air traffic control infrastructure.

He is licensed as an Airline Transport Pilot and as an Aircraft Mechanic. He also has a Bachelor's Degree in Aviation Maintenance Management, and a Masters Degree in Public Administration
