

**Peláez Portales,
Antonio**

Aeronautical Engineer. In 1995 he joined the Directorate General of Civil Aviation as civil servant and worked in the implementation of European ATM projects.

In 2001 he moved to INECO as project engineer and specialised in research and development projects and safety studies for airports and air navigation systems. In 2006 he joined SENASA, where he was tasked to implement the Spanish safety reporting system.

He combines technical and management work with teaching activities, collaborating with several universities and business schools, and is currently an associate professor at the Polytechnical University of Madrid. Since 2016 he has been collaborating with ICAO's GAT conducting and developing aviation courses.
